

HOW TO CLEAN & DESCAL A Keurig

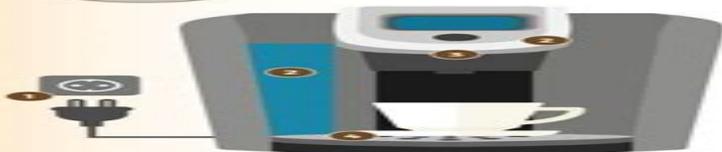

YOU WILL NEED

STEP 1 REMOVE ALL REMOVABLE PARTS

Unplug the machine. Never clean or take apart your Keurig while it's plugged in. Make sure you are working in a well-lit room that is free of clutter. Safety first!

Remove lid and water reservoir. When removing the water reservoir make sure that you don't misplace the O-ring (the rubber ring). Keurig will leak the next time you try to use it.

Remove K-Cup holder and funnel. Be careful of the sharp needle that punctures the Keurig cups.

Remove dirty mesh and cover.

Notes:
Wipe the above with a soft cloth and soapy water. We don't recommend using any of those items in a dishwasher. Soap can be harmful to the plastic. Dishwashers may warp or discolor plastic. Abrasive sponges may scratch plastic parts.

STEP 2 CLEAN EVERYTHING

Clean K-Cup Area with Paper Clip. Use a paper clip to gently scrape the holes that pierce the K-Cup. These holes easily get clogged with coffee and mineral build up. You may have to wiggle the paper clip inside the holes.

Clear Water Line With A Straw. Locate the water line and connect the straw to it. You may have to use your fingers to help make a seal. Blow air through the straw to help try to dislodge any debris inside the water line.

Clean With All-Purpose Cleaner. Use microfiber cloth and all-purpose cleaner to clean the outside of the machine. We recommend spraying cleaner on to the cloth, instead of directly on your Keurig coffee maker.

Clean Water Reservoir & Mesh. Remove the water reservoir and empty it. Remove the water filter if your Keurig has one. Turn on your tap water full stream and allow it to run over the mesh filter inside. This will help dislodge any debris.

STEP 3 DESCALING

Reassemble your Keurig.

Fill the water reservoir with 2/3 white vinegar and 1/3 fresh water.

Run a brewing cycle and dispense of the hot vinegar until the reservoir is empty.

Refill the reservoir with fresh water.

Brew hot water and discard until the reservoir is empty.

STEP 4 - FINISHED! READY TO BREW A FRESH CUP OF COFFEE!

TIPS

Don't Leave Water in the reservoir after brewing. Stagnant water and mineral build up.

Use Vinegar. Vinegar is cheaper than descaling solution and it won't leave a chemical taste in your brewer.

Use Filtered Tap Water. reduces chemicals in water for a better tasting cup of coffee.

Perform A Cleansing Brew After Each Keurig Brews. to keep your Keurig clean and functioning correctly.
