

Superior Court Standing Order 1-17:

Waiver of Detailed Written Findings of Fact Under Superior Court Rule 20(2)(h)

Applicable to All Counties

1. For purposes of Superior Court Rule 20(2)(h), the phrase “waiver of detailed written findings of fact” means waiver of written judicial findings with the level of detail required by Mass. R. Civ. P. 52(a). It does not mean waiver of findings that provide the equivalent of a jury verdict within the meaning of Mass. R. Civ. P. 49. See also Mass. R. Crim. P. 27.
2. Therefore, when the parties agree to waive detailed findings by the judge in a bench trial, the following rules shall apply:
 - a. The judge shall, at a minimum, answer special questions on the elements of each claim, at a level of detail comparable to a special jury verdict form pursuant to Mass. R. Civ. P. 49(a), unless the parties explicitly choose, or the judge expressly orders, findings in the form provided by Mass. R. Civ. P. 49(b) (a general verdict accompanied by answer to interrogatories).
 - b. The parties waive all arguments in the trial court or on appeal that require or depend upon the existence of detailed written findings of fact. Any appellate review of the court’s decision and of the judgment entered shall be according to the standard of review that would apply to a verdict by a jury in a case tried to a jury and to the judgment entered thereon. In addition, the parties may agree to waive their rights of appeal in whole or in part.

The Reference Manual on Scientific Evidence Third Edition assists judges in managing cases involving complex scientific and technical evidence by describing the basic tenets of key scientific fields from which legal evidence is typically derived and by providing examples of cases in which that evidence has been used

First published in 1994 by the Federal Judicial Center the Reference Manual on Scientific Evidence has been relied upon in the legal and academic communities and is often cited by various courts and others

Judges faced with disputes over the admissibility of scientific and technical evidence refer to the manual to help them better understand and evaluate the relevance reliability and usefulness of the evidence being proffered

The manual is not intended to tell judges what is good science and what is not

Instead it serves to help judges identify issues on which experts are likely to differ and to guide the inquiry of the court in seeking an informed resolution of the conflict

The core of the manual consists of a series of chapters reference guides on various scientific topics each authored by an expert in that field

The topics have been chosen by an oversight committee because of their complexity and frequency in litigation

Each chapter is intended to provide a general overview of the topic in lay terms identifying issues that will be useful to judges and others in the legal profession

They are written for a non technical audience and are not intended as exhaustive presentations of the topic

Rather the chapters seek to provide judges with the basic information in an area of science to allow them to have an informed conversation with the experts and attorneys
