Smart Trends in Computing and Communications Tomonobu Senjyu,Chakchai So-In,Amit Joshi,2024-06-01 This book gathers high quality papers presented at the Eighth International Conference on Smart Trends in Computing and Communications SmartCom 2024 organized by Global Knowledge Research Foundation GR Foundation from 12 to 13 January 2024 in Pune India It covers the state of the art and emerging topics in information computer communications and effective strategies for their use in engineering and managerial applications It also explores and discusses the latest technological advances in and future directions for information and knowledge computing and its applications

Handbook of Research on Machine Learning Monika Mangla,Subhash K. Shinde,Vaishali Mehta,Nonita Sharma,Sachi Nandan Mohanty,2022-08-04 This volume takes the reader on a technological voyage of machine learning advancements highlighting the systematic changes in algorithms challenges and constraints The technological advancements in the ML arena have transformed and

revolutionized several fields including transportation agriculture finance weather monitoring and others This book brings together researchers authors industrialists and academicians to cover a vast selection of topics in ML starting with the rudiments of machine learning approaches and going on to specific applications in healthcare and industrial automation The book begins with an overview of the ethics security and privacy issues future directions and challenges in machine learning as well as a systematic review of deep learning techniques and provides an understanding of building generative adversarial networks Chapters explore predictive data analytics for health issues The book also adds a macro dimension by highlighting the industrial applications of machine learning such as in the steel industry for urban information retrieval in garbage detection in measuring air pollution for stock market predictions for underwater fish detection as a fake news predictor and more

Data Science Quick Reference Manual - Advanced Machine Learning and Deployment Mario A. B. Capurso, This work follows the 2021 curriculum of the Association for Computing Machinery for specialists in Data Sciences with the aim of producing a manual that collects notions in a simplified form facilitating a personal training path starting from specialized skills in Computer Science or Mathematics or Statistics It has a bibliography with links to quality material but freely usable for your own training and contextual practical exercises Part in a series of texts it first summarizes the standard CRISP DM working methodology used in this work and in Data Science projects As this text uses Orange for the application aspects it describes its installation and widgets The data modeling phase is considered from the perspective of machine learning by summarizing machine learning types model types problem types and algorithm types Advanced aspects associated with modeling are described such as loss and optimization functions such as gradient descent techniques to analyze model performance such as Bootstrapping and Cross Validation Deployment scenarios and the most common platforms are analyzed with application examples Mechanisms are proposed to automate machine learning and to support the interpretability of models and results such as Partial Dependence Plot Permuted Feature Importance and others The exercises are described with Orange and Python using the Keras Tensorflow library The text is accompanied by supporting material and it is possible to download the examples and the test data

Proceedings of the International Conference on Soft Computing Systems L. Padma Suresh, Bijaya Ketan Panigrahi, 2015-12-28 The book is a collection of high quality peer reviewed research papers presented in International Conference on Soft Computing Systems ICSCS 2015 held at Noorul Islam Centre for Higher Education Chennai India These research papers provide the latest developments in the emerging areas of Soft Computing in Engineering and Technology The book is organized in two volumes and discusses a wide variety of industrial engineering and scientific applications of the emerging techniques It presents invited papers from the inventors originators of new applications and advanced technologies

Applications and Approaches to Object-Oriented Software Design: Emerging Research and Opportunities Altan, Zeynep, 2019-11-29 In today's modernized environment a growing number of software companies are changing their traditional engineering approaches in response to the rapid development of

computing technologies As these businesses adopt modern software engineering practices they face various challenges including the integration of current methodologies and contemporary design models and the refactoring of existing systems using advanced approaches Applications and Approaches to Object Oriented Software Design Emerging Research and Opportunities is a pivotal reference source that provides vital research on the development of modern software practices that impact maintenance design and developer productivity While highlighting topics such as augmented reality distributed computing and big data processing this publication explores the current infrastructure of software systems as well as future advancements This book is ideally designed for software engineers IT specialists data scientists business professionals developers researchers students and academicians seeking current research on contemporary software engineering methods
