Monthly Current Affairs with MCQs for Competitive Exams Disha Experts,2019-09-25 Smart Development in Smart

Communities Gilberto Antonelli, Giuseppe Cappiello,2016-09-13 The concept of smart cities has become one of the most

significant new lines of thinking to emerge in the social sciences in recent years both from the research and policy angles To

date the focus in smart specialization has been on what regions as a whole can do to bring about innovation but it hasn't

necessarily addressed the role cities play within the field This book aims to address that gap drawing together a team of

leading contributors to illustrate this process with particular focus on cities Smart Development in Smart Communities

discusses the cross fertilization between smart specialization and cities in fostering smart development and its interactions

with the macro micro and meso economic framework from both a theoretical and applied perspective Specific topics covered

by the book include human capital formation and utilization centralized decentralized industrial policies innovation policies

collective learning and the role of public utilities in sustaining smart development processes This book tackles some of the

most important questions that must be faced when investigating how structural change and innovation processes are shaping

local and global economic development It will be of interest to academics and researchers in the area of Development

Economics Urban Studies and Public Management **Sino-U.S. Energy Triangles** David Zweig,Yufan Hao,2015-07-24 The

remarkable performance of the Chinese economy in the last three decades has placed China at the centre of the world stage

In 1993 China became a net importer of energy although it was not until the early 2000s that the world began to pay more

attention to China's energy needs and its potential impact on the world With China's energy search occurring within a

hegemonic global structure dominated by the United States the US watches with interest as China enhances its ties with

energy rich states The book examines this triangular relationship and questions whether the US and China are in competition

regarding access to the energy of a third state within the context of a potential power transition It includes case studies on

China's energy relationship with countries such as Canada Australia Saudi Arabia Nigeria Brazil Kazakhstan Iran Sudan and

Venezuela and aims to understand the way a rising power interacts with the existing leading power and the possible outcome

of this competition The analytical framework employed helps the reader to understand not only the nature and pattern of triangles among US China and the Resource Rich States under resource diplomacy but also the salient features of US China competition around the world Making an impressive contribution to the literature in fields such as US China relations international relations Chinese foreign policy and global energy geopolitics this book will appeal to students and scholars of these subjects

Cross-Border Cooperation as Conflict Transformation Maria-Adriana Deiana, Milena Komarova, Cathal McCall, 2022-02-27 Has European integration helped to build peace in Europe and its neighbourhood The book addresses this question through theoretically and empirically informed case studies that explore the successes of and the challenges to EU cross border cooperation as a tool for conflict transformation Conceptually the contributors link the question of transforming conflict to changing understandings of borders and bordering Empirically the contributions represent case studies of practices and discourses of EU sponsored cross border cooperation and challenges to it The case studies encompass the multiple geographical perspectives of the EU internal boundaries its sometimes disputed external borders and borders involving third countries From a thematic point of view the collection focuses on the intersection of two levels at which bordering processes unfold and are enacted the level of governance devolution and international intervention and that of grass roots or civil society efforts including cultural cooperation and artistic production The collection thus offers a kaleidoscopic view of border politics and conflict that zooms in and out of the EU frontiers and their geopolitics of peacebuilding security and cooperation The chapters in this book were originally published as a special issue of the journal *Geopolitics*

Muslim Fashion Reina Lewis, 2015-10-15 In the shops of London s Oxford Street girls wear patterned scarves over their hair as they cluster around makeup counters Alongside them hip twenty somethings style their head wraps in high black topknots to match their black boot cut trousers Participating in the world of popular mainstream fashion often thought to be the domain of the West these young Muslim women are part of an emergent cross faith transnational youth subculture of modest fashion In treating hijab and other forms of modest clothing as fashion Reina Lewis counters the overuse of images of veiled women as evidence in the prevalent suggestion that Muslims and Islam are incompatible with Western modernity *Muslim Fashion* contextualizes modest wardrobe styling within Islamic and global consumer cultures interviewing key players including designers bloggers shoppers store clerks and shop owners Focusing on Britain North America and Turkey Lewis provides insights into the ways young Muslim women use multiple fashion systems to negotiate religion identity and ethnicity
