

# Abacus Flight Management Computer (FMC) Users Guide

The Abacus Flight Management Computer, or FMC, was created by Peter Jacobson. The FMC is a custom gauge that allows you to load flight plans saved with the Flight Simulator 2004 or Flight Simulator X Flight Planner or create your own custom flight plans right from within the FMC gauge itself. Once a flight is loaded or created, the FMC will control the aircraft using the autopilot system and will fly the aircraft hands-free from departure to destination. This documentation will cover:

## Basic Overview of the FMC

### Loading a Flight Plan

### Inserting New Waypoints

### Creating and Saving Custom Flight Plans

### Setting the Autopilot

### FMC Options

## Basic Overview

Once you load an aircraft that is equipped with the Abacus FMC gauge, it will appear in the top left corner of the screen as shown to the right.

The start up screen will run a self-test and verify that the FMC is in proper working order. Once it has passed this test, click the EXEC button. This will show you your aircraft's current position, altitude above ground level (AGL), True Heading, Magnetic Heading, Airspeed in Knots, Vertical Speed, UTC time, Local time and today's date.

You will now have access to the buttons directly below the display screen including:

**MSG:** This button is not used.

**DIR:** The DIR button access the Direct To menu. This allows you to enter in the ID of any airport, VOR, NDB, Intersection, Lat/Long coordinate or pick a nearby Airport, VOR, NDB or Intersection .

**FPLN:** The FPLN button allows you to create a new flight plan within the FMC, load an existing flight plan created and saved by the FS's Flight Planner or view the currently loaded flight plan.

**LEGS:** The LEGS button shows you each waypoint or 'leg' of the current flight plan. From this screen you can choose to fly directly to any waypoint in the loaded flight plan.

**DEP ARR:** This button is not used.

**PERF:** This button is not used.

**MFD MENU:** The MFD MENU button give you access to the Autopilot settings, Radio auto-tune settings, the FMC Settings for auto-sequencing, the distance away from the next waypoint the FMC will auto-sequence to the next waypoint and the auto-altitude hold option.

**MFD ADV:** The MFD ADV button will advance the MFD Data screens. See MFD DATA button below.
