Davis, Davis, 1991 Introduction to Environmental Engineering Mackenzie L. Davis, 1992 Introduction to Environmental Engineering C. David Cooper, 2014-07-25 Dr Cooper's 35 years of university experience and his award winning teaching style are evident in this highly readable authoritative introduction to environmental engineering. Appropriate for all branches of engineering, this text presents fundamental knowledge in a logical up to date manner incorporating abundant examples with step by step solutions to illustrate key concepts. Central to Cooper's treatment is the use of material and energy balances to solve specific environmental engineering problems and to instill a problem solving mind set that will benefit readers throughout their careers. Introduction to Environmental Engineering offers an overview of the profession and reviews the math and science essential to environmental engineering practice. The comprehensive coverage includes water resources, drinking water treatment, wastewater treatment, air pollution control, solid and hazardous wastes, energy resources, risk assessment, indoor air quality and noise pollution. Featuring more than 80 graphics, real world examples and extensive end of chapter problems with selected answers, this volume is an outstanding choice for a first course in environmental engineering.

**Introduction to Environmental Engineering** P. Aarne Vesilind, Susan M. Morgan, Lauren G. Heine, 2009-05-19 This text presents a balanced treatment of environmental engineering by combining engineering concepts with the importance of environmental ethics. This third edition highlights sustainable development and emphasizes the need for engineers to become even more environmentally responsible during this time of increasing awareness of environmental concerns. The authors challenge students with problems that require not only a technical solution but a thorough consideration of its ethical ramifications. The text also provides comprehensive exposure to all types of environmental problems including ecosystem dynamics, wastewater treatment and air pollution control.
