Penny Mukherji, Deborah Albon, 2018-01-27 Research is something many Early Childhood Studies students find intimidating. As a result, this book has been designed with early childhood students in mind to help them through the research process. The book covers the whole research journey, exploring the different methodologies, principles, as well as how to undertake a research project, making it a whole course companion. Following a linear and progressive structure, it logically helps students work through their course and introduces the topics to beginners in simple and clearly explained terms. Once students have gained confidence, they are able to delve into the further reading suggestions and the research in focus boxes, which look at international published examples of research to understand the real world effects and implications. Activities throughout help cement knowledge, and case studies giving examples and scenarios of real student research show readers how to present their own findings. A brand new reader guide to research to aid navigation and a new chapter on research proposals are now also included. This new Third Edition is also complemented by online resources that offer valuable additional resources for both instructors and students, including Videos per chapter relating to chapter outcomes supported by critical questions, Flashcard glossary to consolidate learning, MCQs to test understanding, Testbank of questions for assignment setting, Free journal articles for wider reading, PowerPoint slides.

Penny Mukherji and Deborah Albon will be discussing ideas from *Research Methods in Early Childhood: In Doing Your Early Years Research Project*, a SAGE Masterclass for early years students and practitioners in collaboration with Kathy Brodie.

Hospitality Finance and Accounting Rob van Ginneken, 2019-07-05 Hospitality Finance and Accounting provides a uniquely concise, accessible, and comprehensive introduction to hospitality finance and accounting from a managerial perspective. By avoiding unnecessary jargon and focusing on the essentials, this book offers a crucial breakdown of this often overly complex subject area. The concise chapters cover the essential concepts, ideas, and formulas to be mastered within the hospitality industry, including income statements, balance sheets, pricing, and budgeting. Each chapter is split into two sections: theory and practice, giving students practical insight into the everyday realities of the hospitality industry through case studies which show how theories are applied to a range of relevant scenarios. Emphasis is placed particularly on the practices of revenue and budget management within the food and beverage industry. This will be an essential introductory yet practical resource for all Hospitality students and future managers within the industry.
