Intelligent Fatigue Statistics Zhentong Gao,Jiajin Xu,2024-07-12 This book

introduces the principles and theories of fatigue statistics and presents the Zhentong Gao method along with its practical applications Fatigue in metal components is a complex phenomenon and an important issue because the fatigue life of key components often determines the overall lifespan of the aircraft The book provides an overview and analysis of existing fatigue life calculation and estimation methods including probability statistical methods such as using Gaussian distribution logarithmic Gaussian distribution and Weibull distribution to fit actual data However the authors argue that these methods have limitations in terms of reliability and applicability They point out that the location parameter of the Weibull distribution represents a safe life with 100% reliability Based on these methods the book proposes the intelligent Zhentong Gao method which differs from traditional approaches and effectively addresses and solves the problem of estimating the three parameters of Weibull distribution This title will serve as a valuable reference for researchers senior undergraduate and graduate students and engineers in the fields of aerospace automotive mechanical civil engineering etc

**Experiments In Mathematics Using Maple** Christopher T.J. Dodson, Elizabeth A. Gonzalez, 2012-12-06 We believe that to understand and be comfortable with mathematical concepts and methods it is necessary to do mathematics and traditionally doing meant with a pencil and paper Now a modest home computer can provide a platform for a computer algebra package like Maple which can perform all of the operations encountered in secondary school mathematics and beyond and provide graphical representations of functions including animations The capability of rendering accurate graphics for mathematical functions greatly enhances the learning experience and helps intuition work in new situations before beginning to do the algebra and calculus needed to solve a problem For example if you can see that a function has a clear minimum from its graph then you are more likely to be able to identify its location precisely by analysis This book is designed to support the interactive Maple worksheets that we have developed for the two senior secondary school years and made available via the Internet at the anonymous ftp site <ftp://ut.utoronto.ca/pub/ednet/maths/maple> This takes you from basic algebra functions and sequences to calculus and its applications Thus the book is a hardcopy version of the worksheets with additional explanatory text cross referencing appendices containing worked solutions to all exercises and indexing
