Learning Firefox OS Application Development Tanay Pant, 2015-10-09 Learn to design build and deploy your Firefox OS applications built with web technologies to the Firefox Marketplace About This Book Create beautiful and interactive Firefox OS applications by applying your knowledge of web development Cater your applications to a huge number of users by porting them to the Firefox OS A step by step learning workflow with real life applications to demonstrate the concepts Who This Book Is For This is a practical guide that uses hands on examples to teach you how to create applications for Firefox OS and also how to port applications to Firefox Marketplace This book is intended for developers who want to build applications for Firefox OS An understanding of HTML5 JavaScript and CSS is required What You Will Learn Install use and access the Firefox OS simulator with the help of WebIDE Get to know about application manifest files and the essential difference between web applications and Firefox OS applications Create an application that measures the tapping speed of the user Create an application that allows a user to check in at a place with geolocation tagging Access device specific features with WebAPIs and implement these by building a photo editing and sharing application Submit your own applications to the Firefox Marketplace and share them with others Professionally maintain the

code of your application with the help of Github and deploy your hosted applications to OpenShift. In Detail: With broad compatibility, the latest in web technologies and powerful development tools, Firefox is a great choice for both web developers and end users. Firefox OS's promotion of HTML5 as a first class citizen opens up the walled gardens of mobile application development for web developers. It is because of this initiative that no special SDKs are required to develop for Firefox OS. This book will help you excel in the art of developing applications for Firefox OS. It sequentially covers knowledge building, skills acquisition, and practical applications. Starting with an introduction to Firefox OS, usage of WebIDE, and then the application structure, this book introduces applications of increasing complexity with each chapter. An application that measures your tapping speed, a geolocation tagging application, and a photo editing and sharing application are the three applications that will be built from scratch. You will learn about topics such as the difference between various types of Firefox OS applications, application manifest files, offline apps, and designing principles for applications. You will also learn to test and submit the applications to the marketplace and finally maintain the repository of the Firefox OS application. By the end, you will be able to develop beautifully designed, fully fledged, and rigorously tested Firefox OS applications and also share them at the Firefox OS Marketplace. Style and approach: This book is an easy to grasp workflow with practical examples of real world applications such as Clickr, Check In, and FotoFox. Each chapter explains the concepts which are then reinforced as they are demonstrated in an application or a flowchart.
