

MPA Comprehensive Exam Question Examples

Be aware that questions evolve over time as do the respective core courses. Nonetheless, this list can give you a sense of the types of questions which have reflected the various core domains. It is essential that you study the materials from your core courses to prepare for the exams: do not solely rely on this document as a study guide. These sample questions do not cover the entire range of important learning objectives from the core courses. Some questions may fit into more than one of the core domains shown, and exam questions may integrate across multiple domains.

Note: Statistics (PADM 6110) is not assessed on the MPA comprehensive exam. Therefore sample questions from only eight core course areas are shown below.

For more information on the format of the exam, how it is evaluated, and the scheduled exam date for the semester, please see the [Online MPA Handbook](#) (Section IX, The MPA comprehensive exam requirement) and the links provided in that section. If you have further questions, please check with your [advisor](#) or (in summer) the [department chair](#).

Seminar in Public Administration *n. 201680*

1. "Do public sector managers have to participate in the policy making process? Why? How? Isn't it the manager's job to just implement policies made by elected officials? Why do they have to be involved in policy-making and what kinds of skills and resources do they need to develop?" These questions have been actively explored throughout the development of public administration scholarship. Write an essay discussing the major perspectives on these questions either of the key theorists who have discussed the "proper" role of the public sector manager or from the key era(s) in public administration where that "proper" role has been debated. Include the strengths and weaknesses of the theoretical or historical perspectives you include.
2. Explain why public organizations are said to be more difficult to evaluate than private organizations. Why is this important for early-career public administrators to know?
3. Contemporary public administration has been powerfully influenced by the broader governmental system of which it is a part: by past and present political and administrative values and by contemporary social change. In recent years, increasing attention has been paid to public ethics and "reinventing government" at all levels. Referring to the relevant literature, do you envision this recent trend as a permanent feature in the profession or only a fleeting phenomenon?
4. Based on the United States Constitution, which "internal and external stakeholders," in the policymaking process, possess "constitutional legitimacy" for their role in making public policy? Do entities with "explicit power" have more influence than those entities with "implied powers" in making public policy? Should they? Why or why not?
