Mplab C30 C Compiler Users Guide:

Programming 16-Bit PIC Microcontrollers in C Lucio Di Jasio, 2011-12-14 This guide by Microchip insider Lucio Di Jasio teaches readers everything they need to know about the architecture of these new chips how to program them how to test them and how to debug them

Intelligent Sensor Design Using the Microchip dsPIC Creed Huddleston, 2006-12-18 Intelligent sensors are revolutionizing the world of system design in everything from sports cars to assembly lines These new sensors have abilities that leave their predecessors in the dust They not only measure parameters efficiently and precisely but they also have the ability to enhance and interrupt those measurements thereby transforming raw data into truly useful information Unlike many embedded systems books that confine themselves strictly to firmware and software this book also delves into the supporting electronic hardware providing the reader with a complete understanding of the issues involved when interfacing to specific types of sensor and offering insight into the real world problems designers will face The examples provide a complete easily extensible code framework for sensor based applications as well as basic support routines that are often ignored or treated superficially The goal throughout is to make readers truly productive as quickly as possible while providing the thorough understanding necessary to design robust systems Readers will gain in depth real world design information that will help them be more productive and get up to speed on sensor design skills more quickly The book provides designers and students a leg up in a relatively new design area imparting knowledge about a new microcontroller that offers some of the functionality of a DSP chip Quickly teaches the reader to design the new wave in sensor technology intelligent sensors In depth design techniques real world examples detailed figures and usable code Application chapters thoroughly exploring temperature pressure and load and flow sensors *Newark Electronics*, 2009
