Longhouse Fragmented A:

A Longhouse Fragmented Brian Joseph Gilley, 2014-01-01 Tells the social history of the Iroquois people of Ohio during the buildup to removal A Longhouse Fragmented is a historic ethnography of the Ohio Iroquois and in particular of the people known as the Seneca of Sandusky during the early nineteenth century Using contemporary social theory and interdisciplinary methodologies Brian Joseph Gilley tells the social history of the Native peoples of Ohio before and during the sociopolitical buildup to removal As culturally geographically and socially displaced Iroquois the Sandusky Iroquois were fragmented away from American historiographical constructions of Iroquois social history by the American Indian academic establishment This fragmentation makes the early cultural history of the Ohio Iroquois an ideal foil through which to consider how normalized interpretations of social history come to appear real and have real effects for the subject societies well into the twentieth century These stories are intended to begin an overdue conversation about the effects of a unified Iroquois history congealed around highly specific categories of knowledge This book is groundbreaking in both its content and its theoretical orientation Reframing the story of the Sandusky Senecas removal from a tragic endpoint to an incident in a much longer history of indigenous translocation marks a truly original intervention in the scholarship on Iroquois history and also sheds new light on a little known chapter in the history of Indian removal Jon Parmenter author of *The Edge of the Woods Iroquoia 1534 1701*

Architecture, Society, and Ritual in Viking Age Scandinavia Marianne Hem Eriksen, 2019-02-28 In this book Marianne Hem Eriksen explores the social organization of Viking Age Scandinavia through a study of domestic architecture and in particular the doorway A highly charged architectural element the door is not merely a practical constructional solution Doors control access generate movement and demark boundaries yet also serve as potent ritual objects For this study Eriksen analyzes and interprets the archaeological data of house remains from Viking Age Norway which are here synthesized for the first time Using social approaches to architecture she demonstrates how the domestic space of the Viking household which could include masters and slaves wives and mistresses children and cattle was not neutral Quotidian and ritual interactions with through and orchestrated by doorways prove to be central to the production of a social world in the Viking Age Eriksen s book challenges the male dominated focus of research on the Vikings and expands research questions beyond topics of seaborne warriors trade and craft
