

QUESTION 10

The three test tubes, X, Y and Z below, contain colourless solutions. The solutions in each test tube can either be potassium iodide or sodium carbonate or magnesium sulphate. Tests are carried out to determine which test tube contains which salts.

The following tests were carried out and the observations were made:

- Barium chloride solution is added to solution X; the solution remains colourless.
- Barium chloride solution is added to Y and Z; a white precipitate is formed in both cases.
- Dilute nitric acid is added to the precipitate in solution Y; the precipitate dissolves.

10.1 Define the term *dissociation*.

(2)

10.2 Give a reason why barium chloride solution can be used as electrolyte.

(2)

10.3 Write down the name of the precipitate in test tube Z.

(1)

Use the above information to identify the solutions in each of the test tubes X, Y and Z.

10.4 Write down the LETTER that represents the test tube and next to it, the NAME of the solution and the reason for the choice.

(6)

10.5 What type of reaction takes place between the precipitate in Y and the nitric acid?

The Effortless Economy of Science? Philip Mirowski,2004 A leading scholar of the history and philosophy of economic thought Philip Mirowski argues that there has been a top to bottom transformation in how scientific research is organized and funded in Western countries over the past two decades and that these changes necessitate a reexamination of the ways that science and economics interact Mirowski insists on the need to bring together the insights of economics science studies and the philosophy of science in order to understand how and why particular research programs get stabilized through interdisciplinary appropriation controlled attributions of error and funding restrictions Mirowski contends that neoclassical economists have persistently presumed and advanced an effortless economy of science a misleading model of a self sufficient and conceptually self referential social structure that transcends market operations in pursuit of absolute truth In the stunning essays collected here he presents a radical critique of the ways that neoclassical economics is used to support explain and legitimate the current social practices underlying the funding and selection of successful science projects He questions a host of theories including the portraits of science put forth by Karl Popper Michael Polanyi and Thomas Kuhn Among the many topics he examines are the social stabilization of quantitative measurement the repressed history of econometrics and the social construction of the laws of supply and demand and their putative opposite the gift economy In *The Effortless Economy of*

Science Mirowski moves beyond grand abstractions about science truth and democracy in order to begin to talk about the way science is lived and practiced today Introduction to the Philosophy of Science Arthur Zucker, 1996 The book presents an anthology of readings on the philosophy of science covering traditional issues such as explanation confirmation and progress against a backdrop of historical case studies Discusses the feminist philosophy of science to present a different perspective on the subject and chapters on medicine and psychology dreaming present applications of philosophy and science
