Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems Laurent Perron, Michael A. Trick, 2008-05-20 The 5th International Conference on Integration of AI and OR Techniques in Constraint Programming for Combinatorial Optimization Problems CPAIOR 2008 was held in Paris France May 20 23 2008 The purpose of this conference series is to bring together researchers in the fields of constraint programming artificial intelligence and operations research to explore ways of solving large scale practical optimization problems through integration and hybridization of the fields different techniques Through the years this research community is discovering that the fields have much in common and there has been tremendous richness in the resulting cross fertilization of fields This year we allowed submissions of both long 15 page and short 5 page papers with short papers either being original work a reduced version of a long paper or an extended abstract of work published elsewhere We were not surprised by the 69 submissions in the long paper category this is an active field with many researchers We were surprised by the 61 short paper submissions This was far more than predicted With 130 high quality submissions competition for acceptance in this year's program was particularly fierce In the end we accepted 18 long papers and 22 short papers for presentation and publication in this volume
