Rules governing enforced removals from the UK Great Britain: Parliament: House of Commons: Home Affairs Committee, 2012-01-26 The inquiry launched following the death of Jimmy Mubenga on a deportation flight from the UK found that although there were some positive aspects of the process which is carried out on the UK Border Agency's behalf by a private security contractor initially G4S and since 1 May 2011 Reliance Security the Committee found evidence of inappropriate use of physical restraint and the possible use of unauthorised and potentially dangerous restraint techniques weaknesses in passing on information about detainees medical conditions to all the relevant staff Use of racist language by contractors Use of excessive numbers of contractor staff The Committee recommends that the UK Border Agency should strengthen its procedures so that its own staff feel that they are entitled and expected to challenge any poor conduct on the part of contractors The Committee also rejects the practice of taking detainees to the airport as reserves in case another detainee is taken off a removal flight at the last minute To strengthen safeguards against the ill treatment of prisoners the Committee recommends that members of the Independent Monitoring Boards for immigration removal centres or a similar independent monitoring network be given access to chartered removal flights

Security Entrepreneurs Alexandra Gheciu, 2018-05-10 Focusing on four East European polities Bosnia Serbia Bulgaria and Romania this book examines the dynamics and implications of processes of commercialization of security that have occurred following the collapse of communist regimes These processes have been central to post communist liberalization and have profoundly shaped those states and their integration into European institutional structures and global economic and political circuits They have also affected and been shaped by the behaviour and power of regional and global actors e.g. European institutions regional and global corporations in Eastern Europe By virtue of the fact that they combine in complex ways local national regional and global dynamics and actors processes of security commercialization in the former Eastern bloc can be seen as instances of glocalization Several aspects of security

commercialization are particularly important To begin with private actors specifically private security companies PSCs have been reconstituted as partial agents of public power As such they have come to be systematically involved in performing security practices traditionally associated with the state In addition a potent commercial logic has come to permeate public security institutions This has led to redefinition of the relationship between the state and its population in ways that defy conventional wisdom about the role of the state and pose difficult normative challenges More broadly processes of security commercialization in Eastern Europe which involve important performative dimensions have led to the emergence of complex hybrid networks of security providers that transcend domestic international public private boundaries and behave in many ways as entrepreneurs
