Section: Themes of Biology

Read the passage below. Notice that the sentences are numbered. Answer the questions that follow.

¹ All living things are able to pass on their characteristics (traits) to their offspring because the genes that determine their characteristics are passed on from parent to offspring each generation. ² **Genes** are sets of inherited instructions for making proteins that are coded in a molecule called deoxyribonucleic acid (DNA). ³ The passing of traits from parents to offspring is called **heredity**. ⁴ Heredity is the reason children tend to resemble their parents. ⁵ Sometimes damage causes genes to change. ⁶ A change in the DNA of a gene is called a **mutation**. ⁷ Mutations in sex cells (eggs and sperm) are passed on to other generations. ⁸ Mutations in body cells are not, but they may disrupt the control of cell reproduction, producing cancer.

Lee, Richard Heywood Daly, Richard Daly, 1999-12-16 Hunting and gathering is humanity's first and most successful adaptation. Until 12,000 years ago, all humanity lived this way. Surprisingly, in an increasingly urbanized and technological world, dozens of hunting and gathering societies have persisted and thrive worldwide, resilient in the face of change. Their ancient ways, now combined with the trappings of modernity, are being rediscovered. The Encyclopedia is divided into three parts. The first contains case studies by leading experts of over fifty hunting and gathering peoples in seven major world regions. There is a general introduction and an archaeological overview for each region. Part II contains thematic essays on prehistory, social life, gender, music, and art, health, religion, and indigenous knowledge. The final part surveys the complex histories of hunter-gatherers' encounters with colonialism and the state and their ongoing struggles for dignity and human rights as part of the worldwide movement of indigenous peoples. **Proceedings**, 2009 **Learning and Memory, an Introduction** Jack A.
