Resources in Education, 1979 Evolution Challenges Karl S. Rosengren, Sarah K. Brem, E. Margaret Evans, Gale M. Sinatra, 2012-04-23 A recent poll revealed that one in four Americans believe in both creationism and evolution while another 41% believe that creationism is true and evolution is false A minority only 13% believe only in evolution Given the widespread resistance to the idea that humans and other animals have evolved and given the attention to the ongoing debate of what should be taught in public schools issues related to the teaching and learning of evolution are quite timely Evolution Challenges Integrating Research and Practice in Teaching and Learning about Evolution goes beyond the science versus religion dispute to ask why evolution is so often rejected as a legitimate scientific fact focusing on a wide range of cognitive socio cultural and motivational factors that make concepts such as evolution difficult to grasp The volume brings together researchers with diverse backgrounds in cognitive development and education to examine children s and adults thinking learning and motivation and how aspects of representational and symbolic knowledge influence learning about evolution The book is organized around three main challenges inherent in teaching and learning evolutionary concepts folk theories and conceptual biases motivational and epistemological biases and educational aspects in both formal and informal settings Commentaries across the three main themes tie the book together thematically and contributors provide ideas for future research and methods for improving the manner in which evolutionary concepts are conveyed in the classroom and in informal learning experiences Evolution Challenges is a unique text that extends far beyond the traditional evolution debate and is an invaluable resource to researchers in cognitive development science education and the philosophy of science science teachers and exhibit and curriculum developers **Darwin's Roadmap to the Curriculum** David Sloan Wilson, Glenn Geher, Hadassah Mativetsky, Andrew C. Gallup, 2019 This volume serves to integrate the vast literature in the interdisciplinary field of Evolutionary Studies EvoS providing clear examples of how evolutionary concepts relate to all facets of life It features chapters that outline a variety of applications to evolution education including improved sustainable development medical practices and creative and critical thinking skills Exploring controversies surrounding evolution education this volume provides a roadmap to asking and answering Darwinian questions across all areas of intellectual inquiry Young Children's Developing Understanding of the Biological World Peter J. Marshall, Kimberly Brenneman, 2019-07-23 This book explores current research on young children s beliefs and knowledge about the biological world otherwise known as folkbiology Contributors discuss factors that shape the development of folkbiological knowledge as well as possible interventions designed to counteract cognitive biases that can interfere with the development of scientifically informed reasoning about natural phenomena Taken together the papers provide insights into the contributions of cognitive biases to the development of biological misunderstandings and into the life experiences and contexts that can contribute to or impede accurate learning of biological concepts As part of a wider literature the insights provided by the authors are

relevant to the design of educational experiences that will foster children's exploration and further their understanding of life science ideas. The chapters in this book were originally published as a special issue of *Early Education and Development*.
