LEARNING ACTIVITY SHEET 4b
Mathematics 6 – Solving Routine and Non-Routine Problems
involving Addition and Subtraction of Decimals

I. Introduction

Think about that day when your favorite clothing brand announces they will be having a sale and all the items will only cost ₱ 299.99.

Do you remember that thrilling summer and how happy you are when SM City Clark held a 3-day sale?

Well, you probably don't realize it but decimals actually influence our lives in more ways than we can imagine. Most people have the tendency to buy or acquire things if they see a decimal point in the price simply because we automatically think that ₱ 99.99 is a lot cheaper than paying ₱100. Why? Because that is just how our mind works.

II. Learning Competency

This Learning Activity Sheet was designed and written with you in mind. It is here to help you understand the real world and further develop your problem-solving skills and critical thinking skills. (M6NS - 1d - 108.2)

III. Objectives

After going through this Learning Activity Sheet, you are expected to:

1. Solve 1 or more steps routine and non-routine problems involving addition and or subtraction of decimals and mixed decimals using appropriate problem-solving strategies and tools.
2. Tell the steps in problem solving and write the answers correctly.
