Policing Transnational Crime Saskia Hufnagel, Anton Moiseienko, 2020-06-04 As the threats posed by organised crime and terrorism persist law enforcement authorities remain under pressure to suppress the movement or flows of people and objects that are deemed dangerous This collection provides a broad overview of the challenges and trends of the policing of flows How these threats are constructed and addressed by governments and law enforcement agencies is the unifying thread of the book The concept of flows is interpreted broadly so as to include the trafficking of illicit substances trade in antiquities and legal and illegal migration including cross border travel by members of organised crime groups or foreign fighters The book focuses especially on the responses of governments and law enforcement agencies to the changing nature and intensity of flows The contributors comprise a mix of lawyers sociologists historians and criminologists who address both formal legal and practical on the ground approaches to the policing of flows The volume invites reflection on whether the existing tool kit of governments and law enforcement agencies is adequate in this changing environment and how it could be modernised for example by increased reliance on technology or by reappraising the role of the private sector As such the book will be useful

not only for academics and practitioners who work on security related matters but also more generally to those who are interested in what the near term future of policing is likely to look like and how the balance between law enforcement on the one hand and human rights and civil liberties on the other can be achieved *The Oxford Handbook of Human Development and Culture* Lene Arnett Jensen,2015 The Oxford Handbook of Human Development and Culture provides a comprehensive synopsis of theory and research on human development with every chapter drawing together findings from cultures around the world This includes a focus on cultural diversity within nations cultural change and globalization Expertly edited by Lene Arnett Jensen the Handbook covers the entire lifespan from the prenatal period to old age It delves deeply into topics such as the development of emotion language cognition morality creativity and religion as well as developmental contexts such as family friends civic institutions school media and work Written by an international group of eminent and cutting edge experts chapters showcase the burgeoning interdisciplinary approach to scholarship that bridges universal and cultural perspectives on human development This cultural developmental approach is a multifaceted flexible and dynamic way to conceptualize theory and research that is in step with the cultural and global realities of human development in the 21st century

Malaysian Media Studies: Integrating Perspectives (UM Press) Azizah Hamzah,Amira Firdaus,2016 This edited volume revisits developments in the field of media education and media studies at a time when society is experiencing a ubiquitous networked digital media environment Rapid advances in media and communication technologies and the accompanying developments in social cultural political and economic realms pose unexpected challenges to the curricula of long established media and communication schools As opposed to rigidly structured nation based mass media systems of the past century the new global media sphere celebrates the breaking down of borders whether spatial cultural or social Today in the second half of the second decade of the 21st century this problem translates into what and how to teach students of media who in all likelihood are more adept media consumers and producers than their teachers In a region where educational institutions and educators don t transform as fast as media technologies do there is a need to problematize and to reflect upon the situation This edited volume examines critical issues related to media studies at local institutions of higher learning and includes a sampling of research charting new directions in local media scholarship Contributions to this edited volume reflect the shared concerns of media educators and researchers in Malaysia and two neighboring countries Indonesia and Thailand Three main themes underscore this volume reflecting their importance to the evolution of media education and to a certain extent research as well Historical development of media education and training Current developments and future trajectories of media education in a globalized digital media environment Analysis of media and society **Parliamentary Debates (Hansard)**. Great Britain. Parliament. House of Commons,2013 *Handbook of Global Urban Health* Igor Vojnovic,Amber Pearson,Gershim Asiki,Geoff DeVerteuil,Adriana Allen,2019-05-09 Through interdisciplinary and multidisciplinary perspectives and with an emphasis on exploring patterns as well as distinct and unique conditions across

the globe this collection examines advanced and cutting edge theoretical and methodological approaches to the study of the health of urban populations Despite the growing interest in global urban health there are limited resources available that provide an extensive and advanced exploration into the health of urban populations in a transnational context This volume offers a high quality and comprehensive examination of global urban health issues by leading urban health scholars from around the world The book brings together a multi disciplinary perspective on urban health with chapter contributions emphasizing disciplines in the social sciences construction sciences and medical sciences The co editors of the collection come from a number of different disciplinary backgrounds that have been at the forefront of urban health research including public health epidemiology geography city planning and urban design The book is intended to be a reference in global urban health for research libraries and faculty collections It will also be appropriate as a text for university class adoption in upper division under graduate courses and above The proposed volume is extensive and offers enough breadth and depth to enable it to be used for courses emphasizing a U S or wider Western perspective as well as courses on urban health emphasizing a global context
