## Manual Engineering Drawing Lessons:

**A Manual of Engineering Drawing for Students and Draftsmen (Classic Reprint)** Thomas Ewing French, 2017-11-25 Excerpt from A Manual of Engineering Drawing for Students and Draftsmen Different courses have been designed for different purposes and criticism is not intended but it would seem that better unity of method might result if there were a better recognition of the conception that drawing is a real language to be studied and taught in the same way as any other language With this conception it may be seen that except for the practice in the handling and use of instruments and for showing certain standards of execution copying drawings does little more in the study as an art of expression of thought than copying paragraphs from a German book would do in beginning the study of the German language And it would appear equally true that good pedagogy would not advise taking up composition in a new language before the simple structure of the sentence is understood and appreciated that is working drawings would not be considered until after the theory of projection has been explained About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works [A guide book to technical literature, designed for the use of engineers and others](#) John Birch (and co.), 1891 **The Teaching of Mechanical Drawing** Randolph Philip Hoelscher, 1929 **Manual Training Magazine** Charles Alpheus Bennett, 1912 *Reed's Guide to the Board of trade examinations for extra first-class engineers* William Henry Thorn, 1902 **Classified Catalogue of the Carnegie Library of Pittsburgh. 1907-1911** Carnegie Library of Pittsburgh, 1914 [University of Michigan Official Publication](#), 1955 [Graphic Methods in Education](#) J.
