History of the Pauline Corpus in Texts, Transmissions and Trajectories Chris S. Stevens, 2020-06-15 In History of the Pauline Corpus in Texts Transmissions and Trajectories Chris S Stevens examines the Greek manuscripts of the Pauline texts from P46 to Claromontanus Previous research is often hindered by the lack of a systematic analysis and an indelicate linguistic methodology This book offers an entirely new analysis of the early life of the Pauline corpus Departing from traditional approaches this text critical work is the first to use Systemic Functional Linguistics which enables both the comparison and ranking of textual differences across multiple manuscripts Furthermore the analysis is synchronically oriented so it is non evaluative The results indicate a highly uniform textual transmission during the early centuries The systematic analysis challenges previous research regarding text types Christological scribal alterations and textual trajectories

Scalometry and the Pauline Epistles George K. Barr, 2004-06-15 Scale is well known and understood in creative arts such as architecture sculpture and music but New Testament scholars have given no significant consideration to scale changes in the Biblical texts A robust methodology allows scale changes in literature to be examined scientifically and reveals scale-related patterns in the epistles To determine the significance of these patterns George Barr has conducted a wide survey covering many texts

in Greek Latin and English It reveals that the patterns found in the New Testament are very rare indeed if not unique and gives grounds for the belief that such patterns are associated with authorship The patterns found in the Pauline epistles clarify some theories regarding the origins of the epistles and in some cases shed new light on their compilation
