Multi-Agent Oriented Programming Olivier Boissier, Rafael H. Bordini, Jomi Hubner, Alessandro Ricci, 2020-09-15 The main concepts and techniques of multi agent oriented programming which supports the multi agent systems paradigm at the programming level A multi agent system is an organized ensemble of autonomous intelligent goal oriented entities called agents communicating with each other and interacting within an environment This book introduces the main concepts and techniques of multi agent oriented programming MAOP which supports the multi agent systems paradigm at the

programming level MAOP provides a structured approach based on three integrated dimensions which the book examines in detail the agent dimension used to design the individual interacting entities the environment dimension which allows the development of shared resources and connections to the real world and the organization dimension which structures the interactions among the autonomous agents and the shared environment The book puts the approach into practice using the JaCaMo programming model and platform It employs an easy to follow step by step style showing solutions to increasingly complex scenarios The book also discusses the integration of MAOP into existing technologies and application domains including mobile computing web based computing and robotics Finally it considers artificial intelligence AI related classical problems from an MAOP perspective and discusses an agent oriented approach to software engineering
