Orientalia Division, 1956 **Japanese and American Education** Harry Wray, 1999-06-30 In the United States and Japan there are cultural attitudes that both promote and hinder education While Japanese education is usually described as superior to an American education a careful examination reveals that in both systems certain values and attitudes are carried to extremes and have a negative impact This book shows how cultural attitudes shape schools and how Americans and Japanese can overcome the educational maladies in both countries Under the present educational centralization Japanese secondary school teachers are severely handicapped in carrying out the goals of cultivating a spontaneous spirit

and creating a culture rich in individuality Although Japanese nursery kindergarten and elementary teachers could provide many hints to improve the methodology of their American counterparts the reverse is true at the secondary and college levels American teachers try to encourage students to be creative in approaching a problem writing an essay and sketching an object and they will suggest appropriate courses recommend books and encourage intellectual challenge while Japanese secondary school teachers goal is narrowly focused on presenting designated textual material in as efficient a manner as possible In the United States farmers constitute less than ten percent of the population but American schools still operate as if students had to return home each day for chores or as if the summer vacation and fall schedule had to be used to help parents with planting cultivating and harvesting crops Today most American mothers work full time and children have much more free time and live in less secure urban environments The amount of time spent attending school in Japan and the United States is just one of the cultural attitudes that is examined in this book
