Livingstone,Charles W. J. Withers,1999-12-15 Geography and Enlightenment explores both the Enlightenment as a geographical phenomenon and the place of geography in the Enlightenment From wide ranging disciplinary and topical perspectives contributors consider the many ways in which the world of the long eighteenth century was brought to view and shaped through map and text exploration and argument within and across spatial and intellectual borders The first set of chapters charts the intellectual and geographical contexts in which Enlightenment ideas began to form including both the sites in which knowledge was created and discussed and the different means used to investigate the globe Detailed explorations of maps created during this period show how these new ways of representing the world and its peoples influenced conceptions of the nature and progress of human societies while studies of the travels of people and ideas reveal the influence of far flung places on Enlightenment science and scientific credibility The final set of chapters emphasizes the role of particular local contexts in Enlightenment thought Contributors are Michael T Bravo Paul Carter Denis Cosgrove Stephen Daniels Matthew Edney Anne Marie Claire Godlewska Peter Gould Michael Heffernan David N Livingstone Dorinda Outram Chris Philo Roy Porter Nicolaas Rupke Susanne Seymour Charles Watkins and Charles W J Withers **Proceedings of the High School Conference of ...** ,1912 Geography Unbound Anne Godlewska,1999 At the end of the eighteenth century French geographers faced a crisis Though they had previously been ranked among the most highly regarded scientists in Europe they suddenly found themselves directionless and disrespected because they were unable to adapt their descriptive focus easily to the new emphasis on theory and explanation sweeping through other disciplines Anne Godlewska examines this crisis the often conservative reactions of geographers to it and the work of researchers at the margins of the field who helped chart its future course She tells her story partly through the lives and careers of individuals from the deposed cabinet geographer Cassini IV to Volney von Humboldt and Letronne innovators in human physical and historical geography and partly through
