ICSSSED 2020 Muhammad Nur Sa'ban, Benni Setiawan, Danu Eko Agustinova, Sutanto Trijuni Putro, Robbi Rahim, 2020-11-04 The theme of the conference is Reconstructing Morals Education and Social Sciences for Achieving Sustainable Development Goals This theme was formulated due to several considerations First the symptoms of moral decline that have the potential to destroy the nation Morals guide humanity towards truth and civilization The phenomenon of the dehumanization process in the industrial era that pushed people to be part of abstract societies tends to ignore humanity The education process as a humanitarian system is increasingly marginalized especially during discussions about the industrial revolution 4.0 and Society 5.0 The conference placed six sub themes for speakers and participants to share ideas namely Social Sciences and Laws History and Cultural Studies Interdisciplinary Studies Morals and Humanities Policy Politics and Communication Education The committee has received 195 abstracts from prospective speakers However there are only 80 abstracts that are eligible to be presented at this conference *Geographical Reasoning and Learning* Sonia Maria Vanzella Castellar, Marcelo Garrido-Pereira, Nubia Moreno Lache, 2021-09-15 This book presents the distinctive theoretical and methodological approaches in geography education in South America and more specifically in Brazil Chile and Colombia It highlights cartography and maps as essential tools and provides a meaningful approach to learning in geographical education thereby giving children and young people the opportunity to better understand their situations contexts and social conditions The book describes how South American countries organize their scholar curriculum and the ways in which they deal with geography vocabulary and developing fundamental concepts methodologies epistemological comprehension on categories keywords and themes in geography It also describes its use in teachers practices and learning progressions the use of spatial representations as a potent mean to visualize and solve questions and harnesses spatial thinking and geographical reasoning development The book helps to improve teaching and learning practices in primary and secondary education and as such it provides an interesting read for researchers students and teachers of geography and social studies *An East Asian Challenge to Western Neoliberalism* Niv Horesh, Kean Fan Lim, 2017-08-03 Analysts generally agree that in the long term the biggest challenge to American hegemony is not military but rather China's economic rise This perception is spread in no small measure because Xi Jinping has in the face of patent military inferiority conducted himself much more boldly on the world stage than Hu Jintao Meanwhile China has also begun conjuring up an alternative vision for global leadership now widely termed as the China model This book therefore offers a critical and comprehensive explanation of the China model and its origins Using a range of case studies covering varying historical and geographical approaches it debates whether the Chinese experience in the last three decades of economic reform should be interpreted as an answer to the reigning hegemony of neoliberalism or rather a further reinforcement of it To answer these questions it provides an investigation into what China may have learned from its East Asian neighbours earlier economic successes It also examines how it is

responding to and might even reconfigure the world political economic system as it develops fresh and potentially more powerful regulatory capacities Providing a multi dimensional analysis of the China model the book will be of interest to students and scholars of Chinese Economics Economic Geography and Chinese Studies **Essays in Manuscript Geography** Wendy Scase,2007 The medieval English West Midlands has long been associated with the production of vernacular texts in Old and Middle English and with the making of several famous manuscripts The aim of this volume is to re think assumptions about medieval literature and the region in the light of new research in medieval book history A series of specially commissioned essays in manuscript geography examines the making and use of texts and books in relation to cultural networks in the region and beyond Included are case studies of manuscripts of Worcester and the Worcester diocese from the eleventh to the thirteenth centuries investigations of manuscript production in fourteenth century Shropshire and its wider regional links and essays on textual cultures in Warwickshire from the activities of the aristocrats and gentry of the fifteenth and sixteenth centuries to the projects of later antiquarians Essays in the final section of the volume reflect on the possibilities of large scale corpus based research on medieval manuscript books Collectively the essays identify and explore some of the investments of traditional regionalist accounts of vernacular literary culture and model new theoretical and methodological approaches The Routledge Handbook of Urbanization and Global Environmental Change Karen Seto,William Solecki,Corrie Griffith,2015-12-22 This volume provides a comprehensive overview of the interactions and feedbacks between urbanization and global environmental change A key focus is the examination of how urbanization influences global environmental change and how global environmental change in turn influences urbanization processes It has four thematic foci Theme 1 addresses the pathways through which urbanization drives global environmental change Theme 2 addresses the pathways through which global environmental change affects the urban system Theme 3 addresses the interactions and responses within the urban system in response to global environmental change Theme 4 centers on critical emerging research The History of Cartography, Volume 4 Matthew H. Edney,Mary Sponberg Pedley,2020-05-15 Since its launch in 1987 the History of Cartography series has garnered critical acclaim and sparked a new generation of interdisciplinary scholarship Cartography in the European Enlightenment the highly anticipated fourth volume offers a comprehensive overview of the cartographic practices of Europeans Russians and the Ottomans both at home and in overseas territories from 1650 to 1800 The social and intellectual changes that swept Enlightenment Europe also transformed many of its mapmaking practices A new emphasis on geometric principles gave rise to improved tools for measuring and mapping the world even as large scale cartographic projects became possible under the aegis of powerful states Yet older mapping practices persisted Enlightenment cartography encompassed a wide variety of processes for making circulating and using maps of different types The volume s more than four hundred encyclopedic articles explore the era s mapping covering topics both detailed such as geodetic surveying thematic mapping and map collecting and broad such as

women and cartography cartography and the economy and the art and design of maps Copious bibliographical references and nearly one thousand full color illustrations complement the detailed entries *Refugee Resilience and Adaptation in the Middle East* Haya Al-Dajani, Maysa Baroud, Nasser Yassin, 2023-05-03 This edited volume investigates how refugee communities in the Middle East have adapted to secure their livelihoods within the informal economy Focusing on Lebanon and Jordan which between 2011 and 2020 received more refugees as a proportion of their population than any other countries in the world this edited volume investigates the informal mechanisms that Syrian refugees have adopted to fit into the informal economies of Lebanon and Jordan in the face of significant challenges and barriers The volume investigates how legality temporality connectedness gender and geography among other factors have influenced the emergence of refugee communities informal adaptive mechanisms Drawing on in depth original research among Syrian refugee tribal communities agricultural workers female headed households and micro entrepreneurs the volume provides tangible policy and practice recommendations to help to improve the situation of refugees and vulnerable populations that are employed in the informal economy Highlighting the resilience and agency demonstrated by refugees this edited volume s original community based analysis will be of interest to students researchers and professionals from across Middle East studies refugee studies informal labor economics and development studies *Urban Animals* Tora Holmberg, 2015-03-27 The city includes opportunities as well as constraints for humans and other animals alike Urban animals are often subjected to complaints they transgress geographical legal as and cultural ordering systems while roaming the city in what is often perceived as uncontrolled ways But they are also objects of care conservation practices and bio political interventions What then are the more than human experiences of living in a city What does it mean to consider spatial formations and urban politics from the perspective of human animal relations This book draws on a number of case studies to explore urban controversies around human animal relations in particular companion animals free ranging dogs homeless and feral cats urban animal hoarding and crazy cat ladies The book explores zoocities the theoretical framework in which animal studies meet urban studies resulting in a reframing of urban relations and space Through the expansion of urban theories beyond the human and the resuscitation of sociological theories through animal studies literature the book seeks to uncover the phenomenon of humanimal crowding both as threats to be policed and as potentially subversive In this book a number of urban controversies and crowding technologies are analysed finally pointing at alternative modes of trans species urban politics through the promises of humanimal crowding of proximity and collective agency The exclusion of animals may be an urban ideology aiming at social order but close attention to the level of practice reveals a much more diverse disordered and perhaps disturbing experience **Urban Regeneration and Neoliberalism** Clare Kinsella, 2020-10-29 This book explores the concept of home in Liverpool over phases of regeneration following the Second World War Using qualitative research in the oral history tradition it explores what the author conceptualises as forward facing regeneration in the period up to the 1980s

and neoliberal regeneration interventions that prioritise the past from the 1980s to the present The author examines how the shift towards city centre focused redevelopment and event led initiatives has implications for the way residents make sense of their conceptualisations of home and demonstrates how the shift in regeneration focus discourse and practice away from Liverpool s neighbourhood districts and towards the city centre has produced changes in the ways that residents identify with neighbourhoods and the city centre with prominence being given to the latter Employing Pierre Bourdieu s concepts of habitus and field as mechanisms for understanding different senses of home and shifts from localised views to globalised views this book will appeal to those with interests in urban sociology regeneration geography sociology home cultures and cities
