

How to connect a car amp to a home stereo

SoundCertified.com

You can connect a car amp to any (yes, any!) home stereo receiver or stereo system. The steps & parts needed depend on your car amp's features and if your home stereo has RCA jacks or only speaker outputs.

Example 1

Home stereo with no RCA jacks + car amp with speaker level inputs

Many home stereos don't have RCA jacks to connect to an amp. If your car amp has speaker level inputs you can connect those the stereo's speaker outputs. You can use either unused speaker terminals or connect to others already in use at the same time.

Car amp with speaker level inputs

Remote wire jumpered to the +12V terminal

Example 2

Home stereo with no RCA jacks + car amp with RCA inputs only

For home stereos with no RCA outputs and a car amp without speaker level inputs a line level converter can be used.

These can be connected to unused speaker outputs or alongside speakers already in use.

NOTE: I recommend buying a line level converter with adjustable outputs for best results.

Example 3

Home stereo with RCA jacks

If your home stereo has full range RCA outputs you can easily connect a car amp directly.

Note that subwoofer RCA jacks (called "LFE" sometimes) are low-pass only for use with a subwoofer. These won't work for full-range music.
