Introductory Statistics Neil A. Weiss, 2002 Weiss Introductory Statistics is intended for a one or two semester introductory statistics course. Students learn the core statistical concepts in an applied setting and can access more advanced topics: multiple regression, ANOVA, and Experimental Design through chapters available on the WeissStat CD. With advances in technology and new insights into the practice of teaching statistics, the sixth edition can now easily fit the organization and pace of various course syllabi and technologies in use. The book offers a flexible organization of content and has a more diversified emphasis on using technology such as Minitab, the TI 83 Plus graphing calculator, Excel, and the Internet to investigate statistical problems.

NEW All New Design We have redesigned the text and now feature a four color format for improved readability and understanding.

NEW What Does It Mean This feature, which appears throughout the book, presents the meaning and significance of the statistical results in plain everyday language and emphasizes the importance of interpretation.

NEW Technology Coverage Students are introduced to technology at the section level with Minitab, Excel, and the TI 83 Plus.

Data Science and Social Research N. Carlo Lauro, Enrica Amaturio, Maria Gabriella Grassia, Biagio Aragona, Marina Marino, 2017-11-17 This edited volume lays the groundwork for Social Data Science, addressing epistemological issues, methods, technologies, software, and applications of data science in the social sciences. It presents data science techniques for the collection, analysis, and use of both online and offline new big data in social research and related applications. Among others, the individual contributions cover topics like social media, learning, analytics, clustering, statistical literacy, recurrence analysis, and network analysis. Data science is a multidisciplinary approach based mainly on the methods of statistics and computer science, and its aim is to develop appropriate methodologies for forecasting and decision making in response to an increasingly complex reality, often characterized by large amounts of data: big data of various types (numeric, ordinal, and nominal variables), symbolic data, texts, images, data streams, multi-way data, social networks, etc. and from diverse sources. This book presents selected papers from the international conference on Data Science Social Research held in Naples, Italy, in February 2016 and will appeal to researchers in the social sciences working in academia, as well as in statistical institutes and offices.
