

How to Find the Unit Rate

The **unit rate** is a ratio that compares a quantity to one unit of another quantity. It describes how much of something occurs, is produced, or exists per one unit of another measure, such as "miles per hour" or "price per item."

To find the unit rate, you need to determine the value for one unit and then determine the value for the quantity you need.

Example

If 5 pens cost \$1, then 1 pen costs 20¢.

$$\text{\$1} \div 5 \text{ pens} = 20\text{¢ per pen}$$

This would be the unit rate or the cost per pen (unit cost).

You can find out how much x pens cost by multiplying 20 by the number of pens, x .

Rockswold,Terry A. Krieger,2004-10 Beginning Algebra with Applications and Visualization offers an innovative approach to the beginning algebra curriculum that allows students to gain both skills and understanding This text not only prepares

students for future mathematics courses but it also demonstrates to students the relevance of mathematics. Real data graphs and tables play an important role in the course giving meaning to the numbers and equations that students encounter. This approach increases student interest, motivation, and the likelihood for success. Many students think in visual, concrete terms and not abstractly. This text helps students learn mathematics better by moving from the concrete to the abstract. It makes use of multiple representations: verbal, graphical, numerical, and symbolic applications, visualization, and technology.

Economics Today Roger LeRoy Miller, 2004. Economics Today: The Macro View has long led the field in offering students and instructors a dynamic, application-rich approach to teaching and learning macroeconomics. The book is based on the belief that students learn more when they are involved and engaged. The 12th edition features all new examples that have been selected to grab and hold students' attention. These examples serve one basic purpose: to drive home the application of the theory just presented. One of the keys to the success of Economics Today: The Macro View is that it is suitable for many teaching styles. Instructors who wish to stress theory can do so. Those who wish to stress applications and examples can do that. Those who wish to incorporate technology into the class can do so with ease using MyEconLab.
