### **ORGANISATION AND FUNCTIONING OF THE FINANCIAL SYSTEM FOR SUPPORT OF ENTERPRISE**

**DEVELOPMENT BY BUSINESS ENVIRONMENT INSTITUTIONS IN POLAND** Artur Kuchciński, 2022-01-01 The structure of the work as indicated earlier is based on solving the research problem posed. It results from the adopted goals and formulated research hypotheses. The need to analyse the above issues related to the research area was included in the structure of the thesis divided into four chapters. The first chapter is devoted to the issues of micro small and medium sized enterprises. It presents key definitions and classifications based on the existing legal framework in Poland. A statistical review of SMEs was conducted and the role of this sector of enterprises in the national economy was shown. Moreover, the European Union's policy towards micro small and medium sized enterprises was also reviewed and the main determinants of their development were presented in the light of the quoted research. The second chapter concerns the issue of business environment institutions. It reviews the most important concepts, presents the division of business environment institutions by form of support, analyses the organizational and legal aspects related to the functioning of BEI, also the spatial distribution of the discussed institutions, indicating what role they play and the directions of their further development. The third chapter analyses the activities of business environment institutions in the area of financial support for micro small and medium sized enterprises. The analysis included the activities of loan funds, guarantee funds, business angel networks and private equity venture capital funds on the Polish market. The fourth chapter of the paper concerns the analysis of the functioning of business environment institutions in the field of financing support on the basis of research conducted among micro small and medium sized enterprises in Poland. It presents the methodology of the research, characterizes the research sample and analyses the results obtained. The results of the study were also the final conclusions along with the evaluation of the functioning of financial BEIs and the author's recommendations for future activities for the analysed institutions. The literature in the form of scientific monographs and articles in peer reviewed scientific journals was used to write the study. In addition, legal acts, reports and analyses, internet sources and the author's own research and analysis were also used.

**Global Financial Stability Report, October 2018** International Monetary Fund. Monetary and Capital Markets Department, 2018-10-10. In the 10 years since the global financial crisis, regulatory frameworks have been enhanced and the banking system has become stronger, but new vulnerabilities have emerged and the resilience of the global financial system has yet to be tested.

Commercial & Financial Chronicle, Bankers Gazette, Commercial Times, Railway Monitor and Insurance Journal, 1898. The Financial Review, 1902. World Economic and Financial Surveys, 1987. International Monetary Fund, 1987-01-01. This paper provides an assessment of trends in the international

capital markets including most notably recent market shocks to the financial system and developments in the debt situation. It also reviews the scope of progress achieved over the last few years in strengthening the financial system. Given the extensive changes that have taken place in domestic and international financial markets, the authorities in all industrial countries have begun to adapt their supervisory and regulatory framework to reflect better the new financial environment. These efforts acquired added importance with the recent financial market shocks. The outlook for lending to developing countries that have experienced payments difficulties has deteriorated during the past year. For most of these countries, the prospect for a resumption of spontaneous general purpose bank lending appears very limited. In gauging the vulnerability of the financial system, it should be borne in mind that adverse economic circumstances affecting sovereign loans could have a simultaneous negative impact on domestic credit quality. In some countries, bank exposures to energy, agriculture, real estate, shipping, and elements of heavy industry remain problematic.

The October 2019 Global Financial Stability Report (GFSR) identifies the current key vulnerabilities in the global financial system as the rise in corporate debt burdens, increasing holdings of riskier and more illiquid assets by institutional investors, and growing reliance on external borrowing by emerging and frontier market economies. The report proposes that policymakers mitigate these risks through stricter supervisory and macroprudential oversight of firms, strengthened oversight and disclosure for institutional investors, and the implementation of prudent sovereign debt management practices and frameworks for emerging and frontier market economies.
