Handbook of Research-Based Practices for Educating Students with Intellectual Disability Karrie A. Shogren, LaRon A. Scott, Evan E. Dean, Brad Linnenkamp, 2024-09-10 Now in its second edition, this comprehensive handbook emphasizes research-based practices for educating students with intellectual disability across the life course from early childhood supports through the transition to adulthood. Driven by the collaboration of accomplished nationally recognized professionals of varied approaches, lived experience and expertise and philosophies, the book is updated with new theory and research-based practices that have been shown to be effective through multiple methodologies to help readers select interventions and supports based on the evidence of their effectiveness. Considering the field of intellectual disability from a transdisciplinary perspective, it integrates a greater focus on advancing equity in educational outcomes for students. This book is a professional resource and graduate-level text for preservice and in-service educators, psychologists, speech language therapists and other clinicians involved in the education of children, youth and adults with intellectual disability.

Trust-Based Observations Craig Randall, 2020-07-30 The results of observations are not improving teaching and learning. Pertinently, the Gates Foundation's recently completed effort to improve student outcomes through enhancing the teacher evaluation process failed to achieve substantive improvement. The way observations are currently designed serve as an obstacle to teacher risk-taking. Teachers fear negative evaluations when their pedagogy is rated and they lack faith in being supported by supervisors because a trusting relationship between them and their observer has not been built. Trust-Based Observations: Maximizing Teaching and Learning Growth is a schema-changing evaluation model that understands people perform at their best when they feel safe and supported. It begins with twelve 20-minute observations per week followed by collegial conversations driven by reflective questions, sharing observed teaching strengths and the building of safe and trusting relationships with teachers. Add the elimination of rating pedagogical skills and replace it with rating mindset and teachers' trust. When teachers fully embrace risk-taking and innovation, it leads to remarkable teaching transformations and improved student learning.
