**Prerequisite Concepts:** Evaluation of algebraic expressions given values of the variables

**About the Lesson:** This lesson will deal with finding the unknown value of a variable that will make an equation true (or false). You will try to prove if the value/s from a replacement set is/are solution/s to an equation or inequality. In addition, this lesson will help you think logically via guess and check even if rules for solving equations are not yet introduced.

**Objective:**

**Lesson Proper:**

**I. Activity**

A mathematical expression may contain variables that can take on many values. However, when a variable is known to have a specific value, we can substitute this value in the expression. This process is called *evaluating a mathematical expression*.

Instructions: Evaluate each expression under Column A if  $x = 2$ . Match it to its value under Column B and write the corresponding letter on the space before each item. A passage will be revealed if answered correctly.
