

The Mobile Electronics Certified Professional (MECP) versus the Automotive Service Excellence (ASE) A6 Certification

Many schools or repair shops have traditionally utilized ASE A6 Electronic/Electrical Systems automotive certification as their leading resource for knowledge required to properly service and repair things associated with the vehicle electrical system. While this is a worthy certification, the proliferation of aftermarket components and the broad range of other electronic/electrical system related services that are offered in today's automotive marketplace mean that another certification, the Mobile Electronics Certified Professional (MECP) program, has additional complimentary benefits as well as specific elements to aftermarket products that ASE A6 does not address.

Background of the Certifications

ASE Certification

ASE offers both paper tests (at 700+ locations) as well as computer based testing (at 200+ locations), however the tests are only offered two (2) times per year and advance registration is required. The ASE A6 is an electrical certification in the ASE "Automobile and Light Truck" technician series of certifications intended to cover most of the repair disciplines. If a technician passes all eight of the tests in the exam series, they will earn the "Master Automobile Technician" designation. Participants are given 4 hours and 15 minutes in which to complete each ASE exam.

To become ASE certified, the participant must have two years of hands on work experience in the motor vehicle industry. ASE will allow formal schooling as a substitute for a portion of this experience prerequisite (up to one year of substitution for 2-3 full years of automotive schooling).

MECP Certification

All MECP certification exams are delivered through supervised, computer based testing. The tests are delivered at over 1000 Prometric testing centers or via the network of MECP partners such as vocational schools or industry proctors. Tests can be taken at any time based on the availability of an open seat in a Prometric testing center or the schedule of the proctor. Participants are given three hours in which to complete each MECP exam. There are three technician levels and one level for sales professionals offered by MECP that apply to vehicle electrical and electronic systems:
