

# Informal Auditory Processing Screener

©Kerry Hannon, M.S., CCC-SLP

Informal screening tool used to assess students' auditory processing abilities. It includes syllable manipulation (section 1), word discrimination (section 2), phonemic blending (section 3) and following multi-step directions (section 4). Do not repeat the items. If the student needs repetitions, count it incorrect and make a note in the comments section to determine what level of cueing they require.

## Directions:

Section 1: Instruct the student to say the compound word without one of the parts. Ex. Baseball without ball = base

Section 2: Instruct the student to determine if the words read aloud are the same or different. Be sure to cover your mouth with a piece of paper or an auditory hoop so the student is unable to read your lips.

Section 3: Say the phonemes with a pause in between and instruct the student to blend the sounds together to make the word.

Section 4: Read the directions and instruct the student to follow them.

Passing Criteria: 3 out of 4 items in each section.

\*Note: This is not an official diagnosis of an auditory processing disorder, simply a tool to determine if additional assessments are necessary. A diagnosis of auditory processing disorders requires both language and audiological testing.
