

DESIGNING FOR ALL AGES & ABILITIES

Every design must meet the needs of a diverse range of potential bike riders. Across North America, however, many existing bike facility design practices are limited to only the oldest people being and exclude many who might otherwise use them.

IN AN AGE OF GROWING POPULATION that has become increasingly diverse in age, ability, and ethnicity, it is essential to design transportation systems that are accessible to all. This includes people with disabilities, older adults, and children. Designing for all ages and abilities is not just a moral imperative, it is also a practical one. People of all ages and abilities are essential to the success of our communities.

Urban Bikeway Design Guide

National Association of City Transportation Officials

Third Edition

The third edition of the Urban Bikeway Design Guide provides updated guidance on how to design bike facilities that are safe, usable, and accessible to all people.

OUR VISION

Cities where safe, sustainable, and equitable transportation systems connect communities to the resources they need to thrive

Troch,2015-08-15 This is the definitive guide to VMware virtualization infrastructure design for experienced IT architects. Three of the world's most admired VMware experts bring together comprehensive reference, cookbook, and tutorial information for all phases of infrastructure design, helping you develop and defend even the most complex designs, whether you're serving a customer or facing a brutally tough VCDX panel. Lead author John S. Arrasjid, the world's first VCDX and the program's co-creator, is joined by two elite VMware architects with unsurpassed experience in enterprise and data center virtualization. Together, they cover the entire design lifecycle, address all relevant tools and design outputs, and walk through a best-practice workflow used by top architecture teams worldwide. Coverage includes: Launching the design discovery phase; Reviewing existing design documentation sets; Building out design considerations; Applying high-value infrastructure design patterns; Developing full design documentation sets, including architecture implementation, validation, and operations; Presenting your design, defending it, and gaining buy-in from technical decision makers. *Infrastructure Design Guide*, Greater London Council, Department of Architecture and Civic Design, Deborah Poodry, 1975. **Handbook for Infrastructure Applications of Composite Materials**, 1997.
