**A Practical Guide to Supporting People with Epilepsy** Rebecca Case, Sinead Blake, 2020-05-08 This book is a practical guide with rationale to supporting people with epilepsy It encompasses epilepsy guidance such as NICE 2012 revised 2019 The Equality Act 2010 the children and families act 2014 current evidence based practice and regulatory organisation standards It is predominantly aimed at nurses and student nurses especially those studying learning disability nursing but also residential respite and supported living services schools and family carers to enable them to offer appropriate and evidence based support to people with epilepsy of all ages It is estimated there are approximately 1200 epilepsy related deaths each year in the UK Many of these are considered to be preventable High profile cases have led to an increase in anxiety in people providing services and greater scrutiny of those services by regulatory bodies Over the years the authors have been asked the same questions and witnessed the same misunderstandings and mistakes by people supporting individuals with epilepsy So they looked at the common themes and the resources available It became clear that the information to address these gaps is available but not easily accessible There is lots of information in the public domain however much of it is factual rather than practical This book provides practical information and resources with the focus on what needs to happen how to make it happen and who needs to do it This book is useful for supporting people with epilepsy wherever they live both within and outside the United Kingdom

*Grove's FIELD GUIDE to Climate Change* Bob Grove, 2023-04-12 Face it Climate change has happened It s no longer a future threat We re living with it today Let s just accept that and move forward We have to survive an expanding range of weather extremes an ever growing list of natural disasters a steady drip of pandemic prone viruses and the economic impacts of skyrocketing energy and food costs The environment is filled with new challenges but we can survive even prosper Climate is a big issue and it s easy to get lost in all the jargon and abbreviations Where do you even begin to address something this complex Even if we don t let it overwhelm us emotionally it s far too easy to spend all our time and money digging out of the last disaster instead of preparing for the next There are clear easy steps we can take to prepare for climate change both the climate change that s already here and the climate changes coming down the road The first step is to break this big complex problem down into manageable sections each with a group of small clear actions that are easily taken and together help us secure our health and safety save money and position us for a safe and prosperous future The old adage caveat emptor buyers beware applies to climate change as much as it does to used cars and it s our responsibility to beware of green washing and to make personal choices that assure the health safety and welfare of ourselves our communities our children and future generations This Field Guide will help
