Oakes, 1937 *Full Guide to Telepathy* M. Muzamal Naveed, 2019-10-19 The course aims to provide the reader with a practical guide training and education to develop skills to send and read thoughts from a distance As shown by the title it is a guide written in a more accessible which aims to provide overall guidance and direction to the correct target but only those who comply with all directions and instructions that you find here and they treated seriously but with full confidence The basis of this practical course is a series of documentaries and experiments including the following Almost all classical literature in this area Foundations scientific experiments recorded in the last half century including famous astronauts experience divers etc Own experience Some experts believe that during prehistoric man held a sixth sense that of telepathy He said in this connection that only education objectives and conditions for adaptation to survival of the human brain would have reduced the importance of relationships and like all human faculties were allowed to transcendence sense of telepathy mental communication has atrophied The existence of telepathy in our everyday life but we are always surprised by the evidence that we can meet often Most often these insights we received in the form of relatively more or less clear of some misfortune happened to those we hold dear long sad news before we can come to one of the other common ways of communication Although these messages subtle surprise us most times we do not examine then or afterwards unique moments of amazement that I lived As a result there is no way to realize full well that somehow there must be a law that governs these phenomena At the same time we cannot even grasp the advantage of such communications In conclusion there is no way to understand the content and the existence of forces that govern these processes nor know its power energy Despite these careless conscious or not the results obtained until now researchers show us that we can easily learn to practice this mode of communication and so we can take full advantage of all the benefits that it offers Telepathy could be defined as the ability to communicate between two people through mind people

remote from one another so the lack of physical contact visual auditory or other known As an act of communication telepathy is performed between a transmitter and a receiver The ability to issue or receive messages is more or less developed in different people But it can be improved with exercise To communicate telepathically is also necessary to know the person you wish to contact telepathically As we know it is much easier to learn what others already know but to get to this knowledge through personal experience It is very true that statement Well if this course we will approach this rule in two distinct ways which actually means just a way to reach the intended purpose you will learn first what we know you will experience for yourself that fill the gained knowledge with your own experience The exercises in this course have been designed in order to initiate the art of sending and receiving thoughts from a distance In short almost all lessons that are presented in this course are opted in initiating telepathic exercises

more qualitative lifestyle without under the breath ridicule and harassment This is a global shift in consciousness occurring in all levels of awareness Legions of individuals and other living organisms are beginning to sense the surge of a consciousness shift within themselves from the ant and the tree to the layman and government official Some name this shift in consciousness the age of transformation Whatever one names it it is here Changes change changed and semantic confusion People are groping for words to express new dimensional concepts sensations and experiences with third dimensional language Instructors authors psychics and laymen in this field are coining new words and giving standard words new meanings in trying to explain the variety of experiences of other levels of consciousness and new inner levels of awareness Mankind has not yet evolved a language or a communication system that can adequately explain these new experiences sensations and concepts This is quite normal in a pioneer field but these descriptive terms are multiplying faster than research and study can evolve The written media system is flooded with newly coined words The aim of this volume is to make the groping for words easier when describing noncustomary experiences and theories with the customary language Any situational shift requires a shift in language variety This book contains a concise grouping of the present day shift in language variety and a comparison of this new language variety to words and phrases used in the past in similar philosophies activities and inner dimensional experiences To accomplish this I have recorded words and phrases from 2000 B C the I Ching to interviews of new age workers such as seen on the Phil Donahue Show Terms used in the mystical and parapsychological field over the years are defined described annotated or theorized This literary reference volume is a twofold book in which a textbook interweaves with a dictionary The same wordage synchronizes a dictionary a textbook and a psychic skill development course This means no unnecessary reading of valueless words The material is concise and to the point Every word is important You could say this volume is a shift in a literary style of writing to accommodate the new global shift in consciousness It is a tool for an accelerated style of learning As a teacher in this field for over four decades Dr Bletzer found that students drawn to the study of parapsychology were people of all ages and all walks of life She observed this human potential movement and consciousness shift becoming alive among her students with an accelerated speed in the later years of her life From the sixteen hundred students she taught to develop psychically the amount of time to acquire good psychic skills lessened by half during the last few years She was finding that the public demand for information relating to parapsychology was coming faster than anyone could teach it She found a strong desire to understand the multitude of new terms and new meanings for standard words used to describe new and rediscovered states of awareness and experiences as well as a concrete need for a comprehensive study of the parapsychological field Human beings all over the world will continue to seek means to transform themselves under the new vibrations of the Aquarian Age and the common ground on terminology given in this book will make this easier With no standard textbooks in this field during her many years of teaching metaphysics and psychic development she researched and prepared all her class lectures experiments and course

material With knowledge gleaned from this research she taught psychic development and received feedback from the students being instructed She also read and scanned hundreds of additional books written in the past and present Words and phrases were taken not only from these books but also from magazines pamphlets newspaper articles lectures seminars television and radio programs record jackets and even from herb tea boxes Therefore one will find colloquialisms as well as technical and philosophical terms The bibliography at the end of the volume describes many of these sources Because astrology demonology psychology mythology and many religions have their own glossary these words are not reprinted in this volume unless the term frequently interfaces with parapsychology This book is intended to serve as a reference tool for the beginning student the researcher and the professional First consider this volume as an easy to use comprehensive annotated technical dictionary complete with cross references to ninety percent of the entries The cross references add to the meaning description annotation or sometimes simply presents another person's viewpoint to the reader Although the definitions emphasize simplicity and clarity I tried to retain and reflect the beauty and profoundness given by the mystic philosopher and parapsychologist The annotations are concise and to the point in order to get all the categories in one volume This gives a holistic view of the parapsychology field One may feel there are too many relating subjects but once one is open to this field he or she will be exposed to many of these other fields There are guidelines as to the format used in the dictionary wordage It is suggested that one turn to the categories of his or her interest to see what terms exist In spite of acceleration of popular growth in this field one can quickly acquaint her or himself with the many words which have recently come into usage Also consider this volume as a condensed comprehensive technical para psychology textbook complete with do it by yourself instructions Because the entries are categorized under their particular field and in alphabetical order one can very quickly find much information about the subject of their choice And for a full basic but in capsule form education in this field there are instructions outlining graduated steps for not only the individual just becoming interested but also the long time instructor Language varies in different cultures time periods and even in small groups of one cause It varies because the users of language change it to adapt to their needs Words are alive powerful and constantly growing As a dictionary researcher Dr Bletzer felt it her duty to record the words as they were used not to pass judgment and offer corrections She tried to keep the definition description or annotation as unvarnished and natural as possible so one can more easily understand the philosophy or a new dimension that may be completely foreign to him The overall aim is to make some kind of common ground melding psychic knowledge pot which will bring together time periods and cultures showing similarities and differences in psychic skills and philosophies Language today is being individually designed different meanings and different parts of speech are being given to standard words and old words are being revitalized The reason for this is because there is no common ground melding psychic knowledge pot Humankind needs a synthesization of communication in this discipline today more than ever before Hosts of individuals are finding an inner desire to increase

their psychic skills in order to better understand themselves and to understand how and why the planet is bringing a consciousness shift. Psychic skills and parapsychological information are tools to help understand this consciousness shift and these accelerated times. They are also good tools for those who wish to add to the shift in the earth's consciousness. The hope is that in some small way this volume will aid compatibility, cooperation, and conformity in parapsychological affairs among psychics, humanistic psychologists, holistic health practitioners, scientists, researchers, ministers, meditators, etc. and lessen the semantic confusion. As you study from these references, the hope is that you find it as comforting and educational in learning that man as a universal creature has been using psychic skills, holistic health therapies, etheric world intelligences, etc. in other time periods and in every culture of the world. Confucius said, "Without knowing the force of words, it is impossible to know men."
