Model Context Protocol Niladri Sen, Mehul Gupta, 2025-06-07. Model Context Protocol: Advanced AI Agents for Beginners. A beginner-friendly guide to one of the most important shifts happening in AI right now. This book is for anyone who's ever looked at ChatGPT and thought, "Cool, but can it actually do stuff for me? Like, not just chat. Actually take over tasks, run your software, automate your day." That's where something called the Model Context Protocol (MCP) comes in. It's a lightweight system that lets AI take control of tools you already use: think Figma, Excel, WhatsApp, even Blender, without needing to write a single line of code. Yep, no Python, no APIs. Just set it up and let the AI get to work. Inside, you'll get a hands-on intro to how MCP works, why people are calling it the engine of AI Agents 2.0, and how to start using it right now. You'll learn how to set up over 20 different MCP servers, step by

step even if you've never touched code in your life. The idea is simple: help you automate the boring stuff and get ready for how AI is going to reshape everything from workflows and software to the way we think about work itself. Want AI to build a PowerPoint for you? Sort through Excel sheets? Post on LinkedIn? Design in Figma? This book shows you how to do all that without lifting a finger. Want a free PDF copy? Just email your Kindle transaction details to datasciencepocket@gmail.com and I'll send one over.

What's inside? We'll start from the ground up: What exactly is generative AI? Where do LLMs fit in? And what's so different about AI agents compared to regular chatbots? From there, we'll dive into MCP: how it works, why it matters, and how it connects to tools you already use. You'll also learn how to wire it up with services like LangChain, Zapier, or even run it locally with Ollama and other open-source LLMs. And yep, we'll talk about the risks, too. This isn't some hyped-up fantasy. If you're going to work with autonomous AI, it's worth understanding what could go wrong and how to stay in control. Who's this for? Honestly, anyone—even a little bit curious about AI. Developers, designers, analysts, students, marketers, researchers, it doesn't matter. If you've ever said, "Ugh, I wish AI could just do this for me," this book is a great starting point. And since it's all no-code, you don't need to be technical. If you can follow instructions, you're good.

A few things you'll learn: What AI agents actually are and why they're more than just smarter chatbots. How the Model Context Protocol works under the hood. Step-by-step walkthroughs for setting up AI control over Excel, WhatsApp, Notion, GitHub, SQL, Google Docs, Docker, Figma, PowerPoint, and more. Creating your own MCP Server using it with LangChain and Ollama and other customizations. What to watch out for; yes, the risks are real. And where all this is probably headed over the next few years. Bonus: You can read the first chapter for free using the Kindle app; no Kindle device needed. Just open it on your phone or tablet and dive in.

Many people are interested in AI automation tools but get stuck at the setup stage. The OpenClaw dashboard presents multiple options, integrations, and configuration panels. Messaging connections such as Telegram bots or Discord agents can feel technical. Tutorials online are often fragmented, skip steps, or assume prior experience. As a result, users overthink the structure of their agent, choose the wrong starting point, or abandon the build before testing a working version. This book focuses on usability and execution. You will learn how to build AI agents without coding by following a clear sequence that moves from idea to implementation. Each chapter walks through the exact order of actions so you can move from a blank interface to a functioning autonomous workflow. Inside, you will learn how to: Set up your first OpenClaw AI agent step-by-step. Connect messaging platforms for task execution. Define clear task instructions using simple agent prompt frameworks. Build basic no-code automation workflows. Test, refine, and improve your agent using a
