

CRIB SAFETY GUIDE

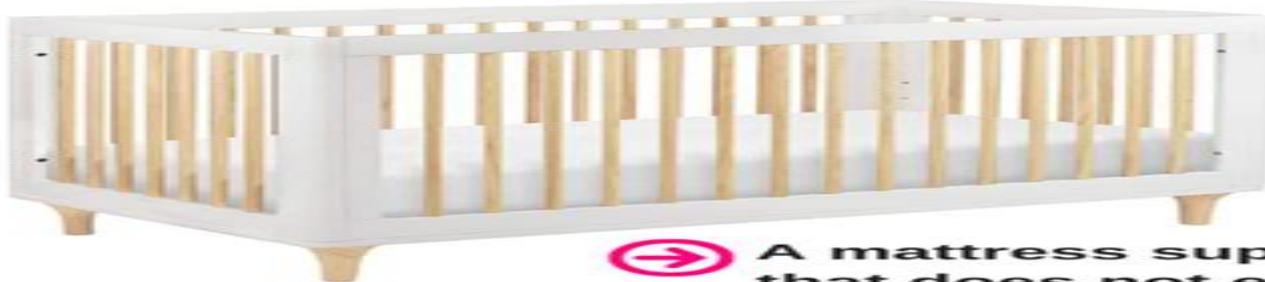

The top of the crib rail should be at least 26 inches from the top of the mattress

The crib should not have drop rails

The slates on the crib should be no more than 6 cm or 2 3/8 inches apart so a baby's body can't fit through the slats

A mattress support that does not easily pull apart from the corner posts so baby does not get trapped between mattress and the crib

Mattress should be very firm and fit snugly so baby can not get trapped between the mattress and side of the crib

No cut-out areas on the head board or foot board so baby's head can not get trapped

Don't use bumpers, bumper pads, blankets and toys in the crib as they pose a risk of strangulation, suffocation and entrapment
