IMPORTANT: Please read these instructions before first using your rifle.

GAMO
Adult Precision Airguns

Gun Safety

- Make sure you know the laws relating to airguns, and abide by them.
- When you pick up any gun always check that it is not loaded.
- Never point a gun at anyone or anything that is not a legitimate target.
- Never leave your rifle unattended, even if it's unloaded.
- Gun safety is a state of mind; never rely on a safety catch.
- After use, put your rifle away safely, unloaded and out of reach of children. Store your pellets separately.
- Always ensure it is safe to shoot and be certain of your target before you squeeze the trigger.
- Make sure there is a safe backdrop behind your target to catch your pellet in case you miss.

- Beware of ricochets - do not shoot at water or other smooth surfaces that may deflect the pellet in a different direction.
- Always unload your gun when crossing obstacles, taking it indoors or into a car.
- When carrying your rifle, be sure the muzzle is always pointing in a safe direction in case you should stumble.
- Never shoot on land without written permission from the owner.

⚠️WARNING Do not brandish or display this airgun in public - it may confuse people and may be a crime. Police and others may think it is a firearm. Do not change the coloration and markings to make it look more like a firearm. That is dangerous and may be a crime.

Technical Information

All Gamo pop airguns are made to the highest standards at our factory in Birmingham. The barrels are cold hammer forged and crowned for optimum accuracy.

Using Compressed Air

⚠️WARNING Use only compressed air in this airgun. Use no other gases-including oxygen, which can cause a fire or explosion that may result in serious injury or death.

Never try to fill your gun with air when the rifle is in a partially assembled state.

The Dynamax can be filled from an air tank or using a hand pump. Whichever equipment is used, a pressure gauge and supply hose bleed device must be included, and the manufacturer's instructions must always be followed.

Telescopic Sights

The Gamo Dynamax has a full length integral 30mm dovetailed scope rail designed to accept standard scope mounts and night vision equipment. Refer to the scope manufacturer's instructions on fitting and adjusting.

⚠️WARNING This airgun is recommended for adult use only. Careless use may result in serious injury or death. Dangerous within 242 yards (221.28 meters).

⚠️WARNING This is not a toy. Failure to follow the safety rules outlined below can result in serious bodily injury or death.

⚠️WARNING These guns are recommended for adult use only. This product is not recommended for unsupervised use by those under 16 years of age. This product is designed to handle and function like a rifle. Do not carry or use this product in any situation where it might be mistaken for a firearm.

Filling the rifle with air

The maximum filling pressure for the Gamo Dynamax is 23.2 BAR. Do not over charge the rifle as this may be dangerous. Doing so will reduce the power and can damage the rifle.

A filling adaptor is supplied with each rifle, this has a restrictor screw supplied which must be screwed tightly in place, to reduce the air flow when using an air tank to fill the gun, or the rifle could be damaged. If using a hand pump the restrictor screw should be loosened or removed using the Allen key provided.

- Before filling, always ensure the gun is unloaded and the safety catch is on.
- Unscrew the end cap from the front of the air reservoir.
- If the air reservoir is empty, cock the rifle.
- Insert the filling adaptor into the filling port, and push it home.
- Make sure the bleed screw on the charging unit is closed, and then open the air bottle valve slowly.
- Slowly fill the gun to the maximum recommended charge pressure, and close the valve. Allow a few minutes for the pressure to settle, and then, if needed, top up the pressure in the gun, and close the valve again.
- Quickly open the air bleed valve on the charging unit to allow the air in the hose to escape.

⚠️WARNING Disconnecting the fill hose from the airgun without bleeding the air first may result in injury from hose whip as a result of pressure in the fill hose.

- Pull the filling adaptor from the filling port and replace the end cap.
- Remember that your rifle may be cocked, if it is you should de-cock it immediately for safety reasons.
- To de-cock your rifle, push the cocking knob in and hold firmly, pull trigger and slowly release the knob until it is back in the rest position.

Regularly check the condition of the filling probe "O" rings and apply a little Molykote 111 grease. Only use this grease on the "O" rings as automotive mineral oils and grease can cause an explosion if used with high-pressure air.
