Drying is one of the first methods invented by man to store foods. This method has a long tradition in the Mediterranean Countries where it has always been widely used. The drying is one of the few methods of food storage that allows to maintain almost unspoiled the organic characteristics and nutrients. And it's easy to guess the benefits also in economic terms of a pantry full of typically summery products. Modern dryers are designed with a strong focus on saving energy: they require modest amounts of electricity and simply work with air. Also, a dried product reduces the initial footprint to 80%–90%.
