

CHALLENGER DK-V1111 ANTENNA

Congratulations on your purchase of the Challenger DK-V1111 GMP Launchpad Antenna. You soon will enjoy the latest in vertical antenna technology. Your GMP antenna has been designed and manufactured to provide superior performance, and a long, trouble-free life.

The GMP technology produces highly efficient, low-Qwide bandwidth performance. As a result, no tuning is required in most amateur installations.

This manual is organized to minimize the amount of time necessary to assemble and install your GMP vertical. It is recommended that you follow the instructions.

Before beginning assembly, take a few minutes to read through the site selection chapter, and to review the safety notices.

READ THE SAFETY NOTICE ON PAGE 2 BEFORE TURNING THIS PAGE

CHAPTER 1: SITE CONSIDERATIONS

1.1 General

It is best to locate the antenna in a clear area, away from wires, metal buildings, fences and trees. As a practical matter, many amateurs must compromise in locating their antenna. This section contains some guidelines to assist in making these compromises.

1.1.1 Site Safety

A) If you have not read the safety notices, do so now. Stay away from power lines, they are life-threatening.

B) Choose an antenna site such that it is not easily accessible to people or pets. Contact with the antenna could be dangerous. The lower tower rods may be at high RF potential during operation. If it is not possible to site the antenna to prevent access, then a wooden fence should be placed around the antenna, after it is erected, to prevent contact.

1.1.2 Nearby Wires and Antennas

In general, any vertical antenna will exhibit mutual coupling with any other vertical structure or wire within a few wavelengths, if the structure approaches resonance at the operating frequency. The GMP is no exception.

Be especially careful with wires or down leads which may be within close proximity of the proposed GMP installation site. These may include other towers, down spouts, coax from other amateur antennas, metal pipes, or TV antenna feed lines on your property or adjoining properties.

While horizontal wires or structures may also affect performance of a nearby vertical antenna, this is much less likely than in the case of a vertical structure.

1.1.3 Buildings

A) It is best to locate the antenna as far from the home as possible, to minimize interaction with house wiring, and RF to consumer electronics.
