

Marking Your Location as a Waypoint

A waypoint is a geographic location that you specify, such as your current location, a point on the Map Page or the location for a track from a device. Waypoints are used in the Find Menu.

- 1 Press and release the **MGRN** key to display the Main Waypoint Page. Observe that your current position is assigned a map symbol, a unique identification number, a date and time of recording, location coordinates, and a default elevation and depth.

- 2 To save the waypoint to the Waypoint List, use the **ENTER** key to select "OK" and press **ENTER**.

To provide more waypoints, refer to the "Using Waypoint" section of the Owner's Manual.

Using the Map Page

The Map Page displays a detailed map of the area around your current location. You can use your program when viewing or comparing a route description. The **PA** and **PL** keys allow you to change the map scale and orientation (day or night) through navigation information.

- 1 Press the **MGRN** key to cycle the Main Page and the Map Page is displayed.
- 2 Press the **MGRN** key to view options for the Map Page.
- 3 Begin to move down and observe the Position Arrow on the map. Use the **DOWN** key to move the Position Arrow to highlight a map feature or other track map data. Refer to the Owner's Manual for more details.

Finding a Destination (Waypoint)

You can search for a destination using the Find Menu. A destination can be any map feature such as a Waypoint, City, or Point of Interest (POI), including an "I" symbol from a map display. The **PA** and **PL** keys allow you to change the map scale from "Current Page" and "Map Page" and to change the map orientation (day or night) through navigation information.

- 1 Press the **MGRN** key to display the Find Menu.
- 2 Use the **DOWN** key to select the "Destination" icon and then press **ENTER** to display the list of waypoints. By default, the **PA** and **PL** keys allow you to change the map scale. Press the **MGRN** key to view the options list.
- 3 Use the **DOWN** key to scroll through the list until the desired waypoint is highlighted. Then press **ENTER** to display the alternative page for that waypoint.
- 4 Use the **DOWN** key to select the "Go to" button at the bottom of the page. Then press **ENTER** to begin navigating to the waypoint.

Navigating to a Waypoint

When using "Go to" navigation, you are directed within a destination (or course) to the waypoint. The distance you are to travel is displayed (e.g., 5.1 E, 90). From any of the screens that use a Position Arrow, you can use the **PA** and **PL** keys to change the map scale and orientation. The **PA**, **COMP**, and **TRIP** (Compare Page) keys allow you to compare your current position with your waypoint directly.

- 1 Press the **MGRN** key repeatedly until the Compare Page is displayed. The page contains a "Starting Point" and a "Compare Key".
- The Position Arrow indicates the direction to go and the Compare Page remains to indicate track information when you begin to move. Digital data fields at the top of the page display selectable navigation information such as speed, distance to go, elapsed time, etc.
- Press the **QUIT** key to return to the Map Page and observe your progress toward the waypoint. A bearing line displays on the map and the Position Arrow tracks as you move.
- Press the **QUIT** key again to return to the Compare Page. The page provides track data such as a trip estimate, maximum speed, etc.
- To stop navigation, press the **MGRN** key with the Compare or Map Page displayed. This selects "Stop Navigation" and press **ENTER**.
