### Part I: Background Material

Answer the following questions after reviewing the background pages for the simulator.

#### Page 1 – Introduction to Moon Phases

Is there a dark side of the moon? (Note: this question can be effectively answered either yes or no, so it is important to explain your reasoning.)

Yes, as the moon's "darkside" doesn't ever face the earth. Since, the moon rotates as does the earth the darkside doesn't turn to face the earth.

Technically, the moon doesn't have a darkside but since it never faces earth that is what we call it.

How long does it take the moon to complete one cycle of phases, in days? 3-4 days

If the moon is full today, what phase do you expect it to be at in a week? third quarter

How about one month later? full moon
