*Frontiers in Physics - 2019 Editor's Choice* Alex Hansen, Thomas Beyer, Ewald Moser, Laura Elisa Marcucci, Ralf Metzler, Christian F. Klingenberg, James Sauls, José W. F. Valle, Jan De Boer, Dumitru Baleanu, Lorenzo Pavesi, Bretislav Friedrich, Christine Charles, Matjaž Perc, Jasper Van Der Gucht, 2020-05-19 Frontiers in Physics (FPHY) is now in its eighth year. Up to last year, the journal received a slowly increasing trickle of manuscripts, and then during the summer Boom! The number of manuscripts we receive started increasing exponentially. This is of course a signal to us who are associated with the journal that we are on the right track to build a first-rate journal spanning the entire field of physics. And it is not the only signal. We also see it in other indicators such as the number of views and downloads, Impact Factor, and the Cite Score. Should we be surprised at this increase? If I were to describe FPHY in one word, it would be innovation. Attaching the names of the reviewers that have endorsed publication permanently to the published paper is certainly in this class. It ensures that the reviewers are accountable; furthermore, the level of transparency this implies ensures that any conflict of interest is detected at the very beginning of the process. The review process itself is innovative. After an initial review that proceeds traditionally, the reviewers and authors enter a back-and-forth dialog that irons out any misunderstanding. The reviewers retain their anonymity throughout the process. The entire review process and any question concerning editorial decisions is fully in the hands of active scientists. The Frontiers staff is not allowed to make any such decision. They oversee the process and make sure that the manuscript and the process leading to publication or rejection upholds the standard. FPHY is of course a gold open access journal. This is the only scientific publication model that is compatible with the information revolution. A journal's prestige is traditionally associated with how difficult it is to publish there. Exclusivity as a criterion for desirability is a mechanism we know very well from the consumer market. However, is this criterion appropriate for scientific publishing? It is almost by definition not possible to predict the

importance of a new idea otherwise it would not have been new So why should journals make decisions on publishing based on predicting the possible importance of a given work This can only be properly assessed after publication Frontiers has removed importance from the list of criteria for publication That the work is new is another matter the work must be new and scientifically correct It would seem that removing the criterion of importance would be a risky one but it turns out not to be The Specialty Chief Editors who lead the 18 sections that constitute FPHY have made this selection of papers published in FPHY in 2019 We have chosen the papers that we have found most striking Even though this is far from a random selection they do give a good idea of what FPHY is about Enjoy We certainly did while making this selection Professor Alex Hansen Field Chief Editor Molecular Biology of the Cell, 2002 MBC online publishes papers that describe and interpret results of original research concerning the molecular aspects of cell structure and function ChatGPT and Gemini for exam preparation QuickTechie.com | A career growth machine, ChatGPT and Gemini for Exam Preparation Score Higher Using AI Help is a comprehensive 2025 guide meticulously crafted for smart students aiming to study faster and smarter by harnessing the power of Artificial Intelligence Recognizing the immense pressure students face in today's academic landscape grappling with complex subjects retaining vast information and performing exceptionally under time constraints this book presented by QuickTechie.com introduces the transformative world of AI powered learning This practical and easy to follow guide empowers students to leverage AI as their personal tutor quiz master planner and motivator significantly improving academic performance across various examinations including school exams college tests entrance exams and competitive government exams Inside this essential resource students will discover A clear understanding of how ChatGPT and Google Gemini function along with responsible and effective strategies for their academic application Techniques for instantly generating personalized notes summaries flashcards and multiple choice questions from any topic or textbook Methods to utilize AI for resolving doubts comprehending challenging concepts and preparing thoroughly for both objective and subjective examinations Guidance on constructing customized study plans and timetables tailored to individual goals available time and syllabus requirements Strategies for preparing essays long answer questions viva exams and even presentations with the invaluable assistance of AI Critical insights into the necessity of fact checking and verifying AI generated answers alongside advice on avoiding common pitfalls Practical real world examples of AI prompts applicable across diverse subjects such as Science Math History and Commerce This guide a testament to QuickTechie.com's commitment to cutting edge educational resources is designed to be student first simple practical and immediately usable requiring no coding skills or engineering knowledge Each chapter is enriched with real life examples smart tips and necessary warnings Whether for a high school student a college goer or a competitive exam aspirant this book provides a distinct advantage not by replacing effort but by profoundly multiplying its effectiveness As QuickTechie.com emphasizes AI is not merely the future it is the present and the most astute students are already embracing its power **Instructor's**
