

## Entertainment Systems

### USB port (if equipped)

Driving while distracted can result in loss of vehicle control, accident and injury. Ford strongly recommends that drivers use extreme caution when using any device that may take their focus off the road. The driver's primary responsibility is the safe operation of their vehicle. Only use cell phones and other devices not essential to the driving task when it is safe to do so.

Your vehicle may be equipped with a USB port inside your center console. This feature allows you to plug in media playing devices, memory sticks, and also to charge devices. For further information on this feature, refer to *Using your USB port* in the *SYNC supplement*.

### GENERAL AUDIO INFORMATION

#### Radio frequencies:

AM and FM frequencies are established by the Federal Communications Commission (FCC) and the Canadian Radio and Telecommunications Commission (CRTC). Those frequencies are:

AM: 530, 540–1700, 1710 kHz

FM: 87.7, 87.9–107.7, 107.9 MHz

#### Radio reception factors:

There are three factors that can affect radio reception:

- **Distance/strength:** The further you travel from an FM station, the weaker the signal and the weaker the reception.
- **Terrain:** Hills, mountains, tall buildings, power lines, electric fences, traffic lights and thunderstorms can interfere with your reception.
- **Station overload:** When you pass a broadcast tower, a stronger signal may overtake a weaker one and play while the weak station frequency is displayed.
