Visual Field Test	Checks for the presence of blind spots (scotomas) in your peripheral or "side" vision which can originate from eye diseases such as glaucoma.		X
Fundus Photos	Digital images of the interior of the eye that are painlessly captured using specialized photographic equipment to detect abnormalities of the retina, vitreous, choroid, and optic nerve.		X
External Eye Photography	Pictures of the eye taken with a high-resolution digital camera are used to gauge the progression of skin conditions that can affect the eye area such as eyelid lesions, rosacea, blepharitis, or skin cancer.		X

*Note that every patient has their own specific vision health requirements, and some symptoms that may be observed during an examination could prompt a need for additional diagnostic tests. The final price of any eye examination is subject to change depending on the number of specific tests that are performed.*
