Contemporary Australian Archaeology Rocco Bosco,Darran Jordan,2018-04-18 Popular culture has often presented a mythologised version of archaeology that at times misinforms the general public about broader academic intentions The fantastic and bizarre continue to capture the public imagination so that while archaeological teams excavate survey and record they occupy the same geographic locations as ghost tour operators and seekers of the supernatural Not only does archaeology operate within the same geography as modern mythology but widespread access to technology from satellite imagery to GPS data means that enthusiastic amateurs can partake in their own investigations With limited landscape identification training an enthusiasm for discovery and strange cultural biases fringe operators have utilised new technologies to justify old fallacies through variant forms of amateur archaeology This collection draws on the wealth of work currently being undertaken by contemporary archaeologists in Australia from rock art observations to art archaeology experiments and even space archaeology It explores archaeology on the edge contextualising the fringe dwellers that operate on the periphery of accepted academia It also looks at contemporary archaeological theory and practice in relation to these fringe operators developing approaches toward interaction in contrast to the more common reaction of repudiation The relationship between the accepted centre and the outer edge in contemporary archaeological practice and theory unveils much about popular misconceptions and how archaeological spaces can be overlaid with variant mythological and cultural interpretations
