**POPcorn facts** - Explain to students that they will be counting multiples of 2 about while "blasting and holding their breath" like a corn kernel. When a multiple of 2 is said, students will POP up as they say the multiple of 2, and then return to a small kernel. (Example: 2, 4, 6, 8, 10, 12, 14, 16, 18, 20, 22, etc.)

**Arrays, the multiplication symbol "x" and the student what can be said instead of "times"** - Review items of the "Grids of 1's" they learned in the last lesson. Draw a model of 3 rows of 4 and ask them what they notice. Explain that the multiplication symbol can also mean "times" or "times times" the original row, row, and column.

Give each student a piece of the multiplication array graphing paper and make instructions. Have students build the array for each multiplication fact after saying "times" or instead of "times" (3 x 4 "times of 4")

After building the array with counters, have students color the grid to show the same model and write the product. Then, students can turn the paper sideways to see the related fact, using the row they see and counting the items in each row. A hand copy is included for teachers to abbreviate lesson.

Give each student a copy of the "Grids of 1's" worksheet. Students will fill and glue to match the multiplication fact to the correct array. Then, students will find the product and fill the blank.
