A Basis for Practice, 2002 The philosophy and curriculum framework for the IBO programme for children aged 16 19 Print companion to the online version www.ibo.org 20 pp colour Complements the Schools guide to the Diploma Programme which focuses on the curriculum in practice Summary Brief David T. Conley, Terri Ward, 2009 Although the International Baccalaureate IB Diploma Programme is offered by many high schools in the United States and considered to be challenging and rich in content the curriculum has not been analyzed to determine its alignment with college readiness standards or state educational standards in the U S The research methodology employed by this project was a professional judgment model often referred to as convergent consensus It requires the repeated review of documents by experts who make changes at each review stage designed to move toward consensus agreement on a final document that achieves a set of pre established goals In this case the goal was to develop a set of standards that represented the knowledge and skills students learn in the curriculum of the IB Diploma Programme The results of this study clearly confirm the strong relationship between the IB Diploma Programme and standards for college readiness and success The IB standards demonstrate a very high degree of alignment with the KSUS standards in all subject areas In addition many of the individual IB standards are at a level more advanced than entry level college courses Furthermore the IB standards address key cognitive strategies that are critical to success in entry level college courses These key cognitive skill areas are rarely addressed in state content standards but are identified almost universally by college instructors as being central to success in entry level college courses These key cognitive skill areas are rarely addressed in state content standards but are identified almost universally by college instructors as being central to success in entry level college courses In short students who participate successfully in IB should be well prepared to succeed in entry level college general education courses and in some cases to have already learned material covered in such courses Contains 1 table **The Diploma Programme from Principles Into Practice**, 2009 Ib course book: higher level maths discrete.
