heightened inequality and segregation and decreased incentives to innovate and create The Complacent Class argues that this cannot go on forever We are postponing change due to our near sightedness and extreme desire for comfort but ultimately this will make change when it comes harder The forces unleashed by the Great Stagnation will eventually lead to a major fiscal and budgetary crisis impossibly expensive rentals for our most attractive cities worsening of residential segregation and a decline in our work ethic The only way to avoid this difficult future is for Americans to force themselves out of their comfortable slumber to embrace their restless tradition again *Muslim Fashion* Reina Lewis,2015-10-15 In the shops of London s Oxford Street girls wear patterned scarves over their hair as they cluster around makeup counters Alongside them hip twenty somethings style their head wraps in high black topknots to match their black boot cut trousers Participating in the world of popular mainstream fashion often thought to be the domain of the West these young Muslim women are part of an emergent cross faith transnational youth subculture of modest fashion In treating hijab and other forms of modest clothing as fashion Reina Lewis counters the overuse of images of veiled women as evidence in the prevalent suggestion that Muslims and Islam are incompatible with Western modernity Muslim Fashion contextualizes modest wardrobe styling within Islamic and global consumer cultures interviewing key players including designers bloggers shoppers store clerks and shop owners Focusing on Britain North America and Turkey Lewis provides insights into the ways young Muslim women use multiple fashion systems to negotiate religion identity and ethnicity *Emerging Technologies for Smart Cities* Oluwayemi-Oniya Aderibigbe, Trynos Gumbo, Samson Olawale Fadare,2024-08-13 This book examines the use of smart city associated technologies to enhance sustainable transportation planning in cities of both the global north and south focusing specifically on sustainable transportation The authors of the book examine technologies and tools such as UAVs GIS cutting edge information and communication technologies machine learning and big data to assess their potential for reducing traffic redirecting traffic to assigned routes monitoring traffic growth and development in our urban centres with the ultimate aim of reducing congestion commuting time accidents and pollution to promote climate action and a just transition The book offers a comparative study of transport situation and planning in the developed and developing countries focusing on the United States of America Germany and Singapore in the Global North on one hand and South Africa Nigeria and India from the Global South on the other As more and more of the world s population lives in urban centers proactively monitoring and managing car traffic is essential The book will be of interest to academics and researchers in the built environment architecture urban and regional planning construction management quantity surveying geography engineering environmental sciences social sciences public policy design in both the developed and developing countries [Asia in International Relations](#) Pinar Bilgin,L.H.M.
